

Monitoring E-Cigarette Sales: National Trends

This report highlights trends from February 2019 to June 2026.

Notice of Brief Formatting and Revision to Previous Data Estimates

- For the best viewing experience, please open this PDF in Google Chrome. Some features or formatting may not display correctly in other browsers or PDF viewers.
- The data in this brief have been updated to capture new e-cigarette products coded by Circana (formerly IRI). Historical sales estimates may differ from previous briefs.

Federal Regulatory Actions

- In February 2020, the U.S. Food and Drug Administration (FDA) began prioritizing enforcement of existing regulations against prefilled e-cigarette cartridges in flavors other than tobacco and menthol. This prioritization did not apply to e-liquid bottles or single-use disposable e-cigarettes. Since February 2020, sales of disposable e-cigarettes have increased markedly.
- In May 2026, FDA issued new enforcement guidance indicating they would not prioritize enforcement against certain unauthorized e-cigarettes with pending applications.
- As of September 2026, FDA has authorized 48 e-cigarette products to be marketed in the United States.¹ These are the only products that may lawfully be sold in the United States. Nearly 70 percent of e-cigarette sales in U.S. convenience and grocery stores were unauthorized as of December 2025.²

Key Findings

Total E-Cigarettes:

- During the 6-month period ending on June 14, 2026, the total number of e-cigarette products sold in tracked Circana retail sales channels in the United States reached 6,564 products (excluding hardware and accessories),² of which 6,149 (93.7%) were disposable e-cigarettes.
- From February 2, 2020, to June 14, 2026, total monthly e-cigarette unit sales increased by 25.2% (15.5 million units to 19.4 million units); non-tobacco-flavored e-cigarette sales (mint, menthol, clear/other cooling and other flavors) increased by 41.4% (11.1 million units to 15.7 million units). By June 14, 2026, non-tobacco-flavored e-cigarette sales accounted for 80.9% of total unit sales.
- From February 2, 2020, to June 14, 2026, the total amount of e-cigarette nicotine sold per month increased by 235.3% (2.7 billion to 9.0 billion milligrams). This increase was 9.3 times greater than the 25.2% increase in standardized unit sales. (Units of e-cigarettes are not adjusted to account for variations in unit size. Total nicotine sold, on the other hand, accounts for increases in nicotine strength and the amount of e-liquid in recent disposable e-cigarettes.)
- The top 10 purchased brands from April 19, 2026, to June 14, 2026, were (in descending order of dollar sales) Vuse, JUUL, Geek Bar Pulse, Breeze Smoke, Foger Switch Pro, RAZ, Breeze Prime, NJOY, HQD and Lost Mary.³ The top 5 brands and top 10 brands accounted for 71.7% and 80.4% of total dollar sales, respectively.
- According to the 2025 National Youth Tobacco Survey (NYTS), 7.1% (1.13 million) of high school and 2.6% (300,000) of middle school students currently used e-cigarettes. Among those who currently used e-cigarettes, 89.4% used flavored e-cigarettes.^{4,5}

Flavored Disposable E-Cigarettes:

- From February 2, 2020, to June 14, 2026, disposable e-cigarette sales increased by 190.0% (4.0 million units to 11.7 million units); their unit share increased from 25.9% to 60.1% of total e-cigarette sales. As of June 14, 2026, 92.8% of disposable e-cigarette unit sales were of non-tobacco flavors.
- Among youth who used e-cigarettes in 2025, 66.3% used disposable e-cigarettes (NYTS).⁵

Menthol-flavored E-Cigarettes:

- From February 2, 2020, to June 14, 2026, overall menthol-flavored e-cigarette sales increased by 12.5% (5.1 million units to 5.7 million units). Menthol-flavored cartridge sales increased by 3.1% (4.7 million units to 4.9 million units). As of June 14, 2026, menthol-flavored e-cigarette sales accounted for 29.5% of the overall e-cigarette market and 63.1% of the prefilled cartridge market.
- Among youth who used flavored e-cigarettes in 2025, 15.5% used menthol flavor (NYTS).⁵

Relevant Issues

- During 2020–2026, additional flavored tobacco products continued to be marketed (e.g., flavored cigars) or entered the market (e.g., nicotine pouches).
- Following California's prohibition of flavored tobacco product sales in December 2022, sales of products branded as clear, clear ice and unflavored, likely containing non-menthol synthetic cooling agents, increased (e.g., Flum Pebble Clear, EB Design BC5000 Clear). These products are categorized as Clear/Other Cooling in this data brief.
- The e-cigarette or vaping product use-associated lung injury (EVALI) outbreak in late 2019 and COVID-19 pandemic may have affected e-cigarette sales.

Conclusion: Restrictions that exempt certain flavors and product types likely shift sales to the products and flavors that remain on the market. Policies that prohibit the sale of all flavored tobacco products, including flavored e-cigarettes, reduce tobacco product sales and use of tobacco products.⁶

Figure 1. National E-Cigarette Unit Sales by Flavor

■ Menthol
 ■ Mint
 ■ All Other Flavors [†]
■ Tobacco-Flavored
 ■ Clear/Other Cooling [†]
■ Unknown

* Sales data do not reflect sales from vape shops or online retailers; dates represent end of 4-week periods; e-cigarette accessories and devices sold without e-liquids were excluded (1.4% of total dollar sales in 2025). Unit sales were standardized to reflect the most common package size for each product type. A standardized unit was equal to five prefilled cartridges, one disposable device or one e-liquid bottle.

** Sales estimates from 2019 reflect preserved data from custom CDC Foundation analyses using archived Circana data that are no longer updated or included in Circana's current sales projections.

[†] "All other flavors" category includes fruit, clove/spice, chocolate, alcoholic drink (e.g., wine, cognac or other cocktails), candy/desserts/other sweets, some other flavor; "clear/other cooling" category includes products with flavor names such as clear, clear ice or unflavored, which likely contain non-menthol synthetic cooling agents (e.g., Flum Pebble Clear, EB Design BC5000 Clear) and which observe an increase in sales following California's flavored tobacco product sales restrictions beginning December 2022.

Trends of Unit Sales by Flavor Following FDA's 2020 Flavor Enforcement Policy

From 2/2/2020 to 6/14/2026, unless otherwise specified

Total monthly e-cigarette sales increased from 15.5 million to 19.4 million (+25.2%).

Tobacco-flavored e-cigarette sales decreased from 4.4 million to 3.6 million (-18.0%); unit share decreased from 28.3% to 18.6%.

Non-tobacco-flavored e-cigarette sales increased from 11.1 million to 15.7 million (+41.4%); unit share increased from 71.7% to 80.9%.

Menthol-flavored e-cigarette sales increased from 5.1 million to 5.7 million (+12.5%); unit share decreased from 32.9% to 29.5%.

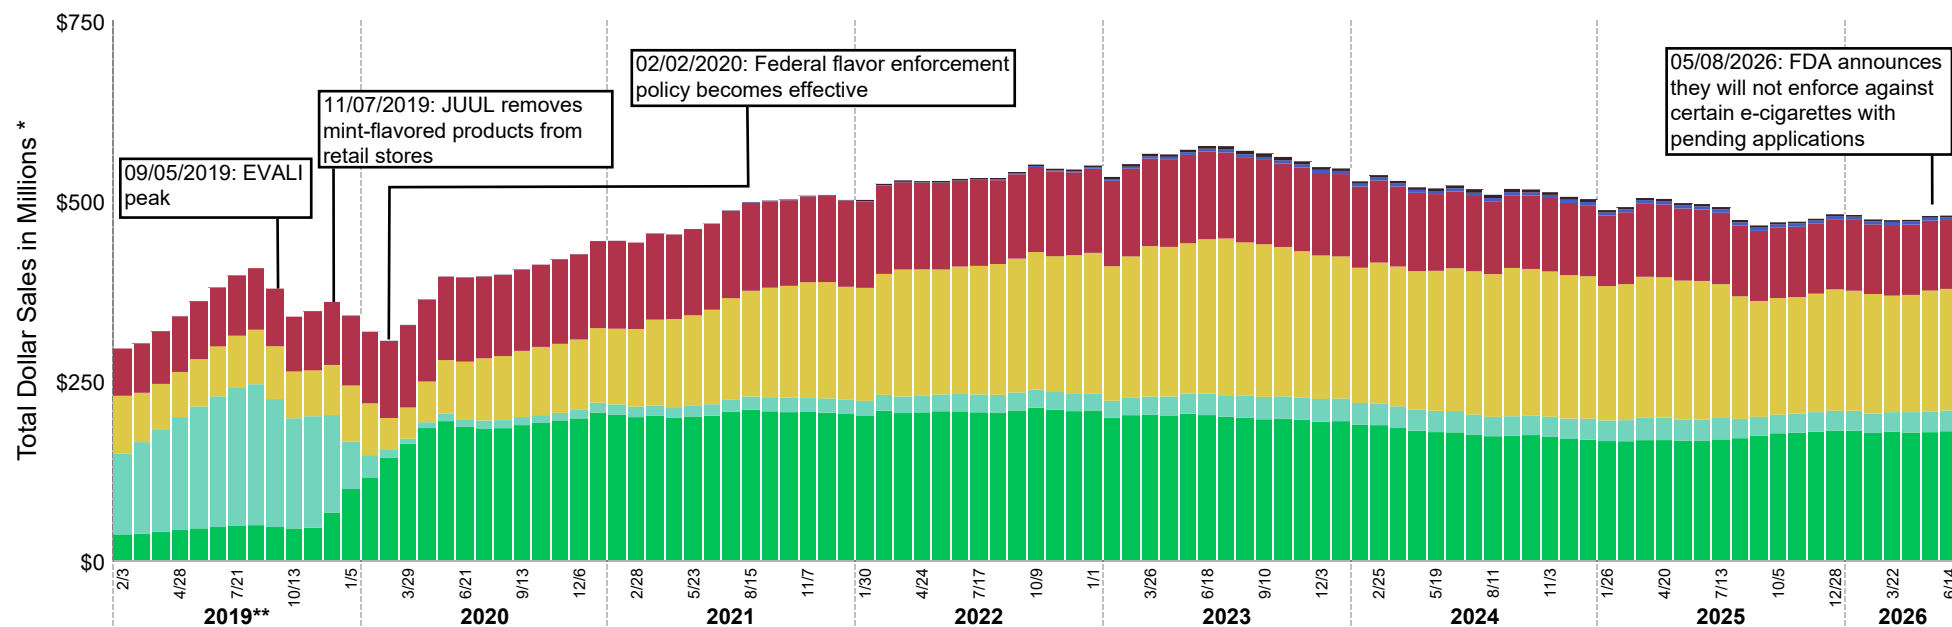

Mint-flavored e-cigarette sales increased from 1.4 million to 1.6 million (+10.8%); unit share decreased from 9.1% to 8.0%.

Other-flavored e-cigarette sales increased from 4.6 million to 8.2 million (+77.5%); unit share increased from 29.7% to 42.0%.

Between 12/4/2022 and 6/14/2026 clear/other cooling flavored e-cigarette sales increased from 83.8 thousand to 268.1 thousand (+219.9%); unit share increased from 0.3% to 1.4%.

Figure 2. National E-Cigarette Dollar Sales by Flavor

■ Menthol
 ■ Mint
 ■ All Other Flavors [†]
■ Tobacco-Flavored
 ■ Clear/Other Cooling [†]
■ Unknown

* Sales data do not reflect sales from vape shops or online retailers; dates represent end of 4-week periods; e-cigarette accessories and devices sold without e-liquids were excluded (1.4% of total dollar sales in 2025).

** Sales estimates from 2019 reflect preserved data from custom CDC Foundation analyses using archived Circana data that are no longer updated or included in Circana's current sales projections.

[†] "All other flavors" category includes fruit, clove/spice, chocolate, alcoholic drink (e.g., wine, cognac or other cocktails), candy/desserts/other sweets, some other flavor; "clear/other cooling" category includes products with flavor names such as clear, clear ice or unflavored, which likely contain non-menthol synthetic cooling agents (e.g., Flum Pebble Clear, EB Design BC5000 Clear) and which observe an increase in sales following California's flavored tobacco product sales restrictions beginning December 2022.

Trends of Dollar Sales by Flavor Following FDA's 2020 Flavor Enforcement Policy

From 2/2/2020 to 6/14/2026, unless otherwise specified

Total monthly e-cigarette sales increased from \$317.2 million to \$478.3 million (+50.8%).

Tobacco-flavored e-cigarette sales decreased from \$99.4 million to \$95.6 million (-3.8%); dollar share decreased from 31.3% to 20.0%.

Non-tobacco-flavored e-cigarette sales increased from \$217.7 million to \$380.5 million (+74.7%); dollar share increased from 68.7% to 79.5%.

Menthol-flavored e-cigarette sales increased from \$114.7 million to \$178.8 million (+55.9%); dollar share increased from 36.2% to 37.4%.

Mint-flavored e-cigarette sales decreased from \$31.0 million to \$28.8 million (-6.9%); dollar share decreased from 9.8% to 6.0%.

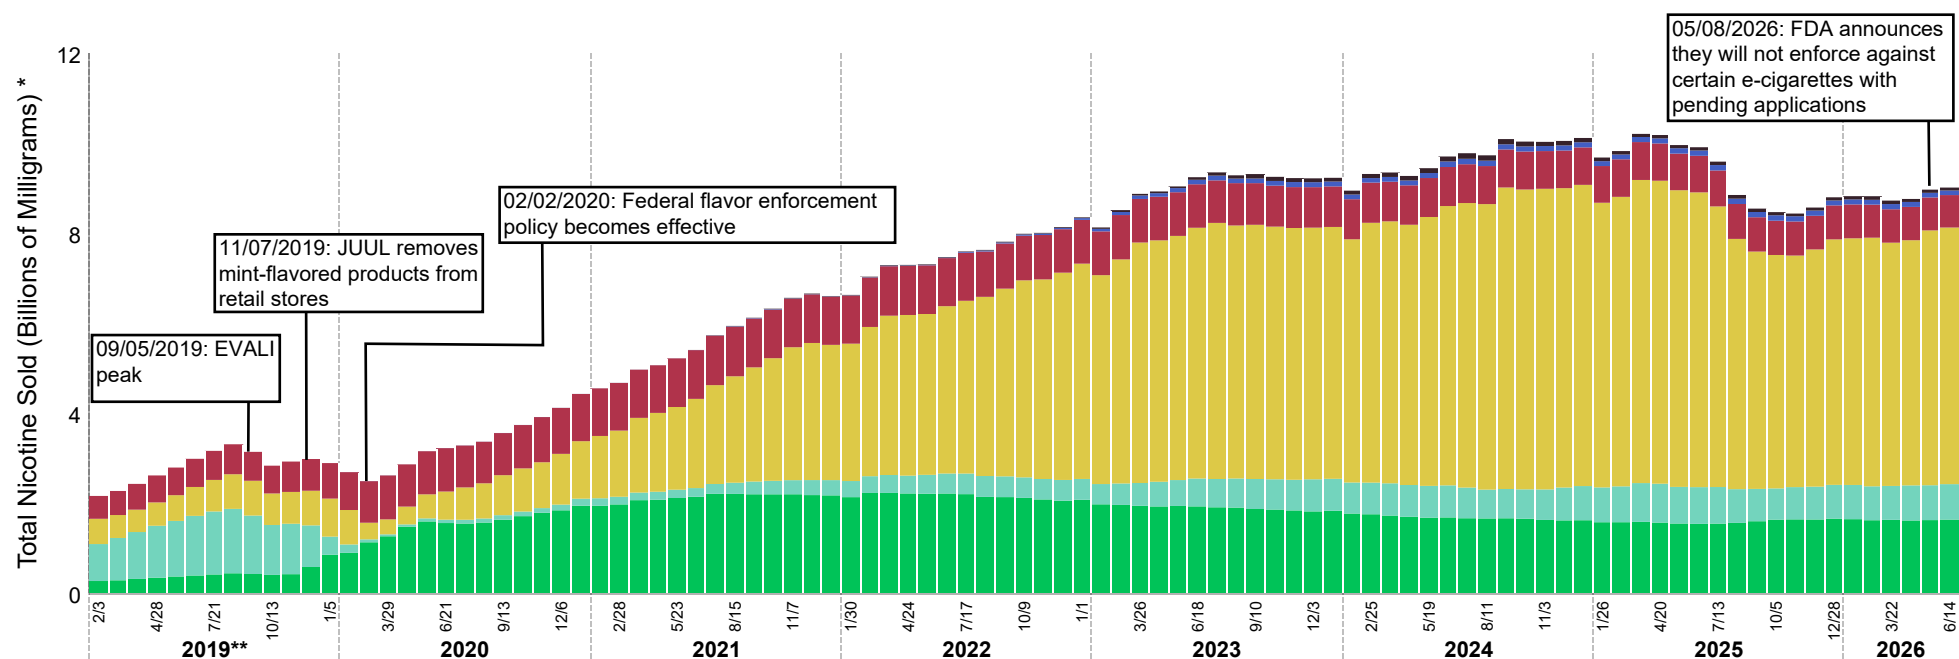

Other-flavored e-cigarette sales increased from \$72.0 million to \$168.9 million (+134.7%); dollar share increased from 22.7% to 35.3%.

Between 12/4/2022 and 6/14/2026 clear/other cooling flavored e-cigarette sales increased from \$1.4 million to \$3.9 million (+182.7%); dollar share increased from 0.3% to 0.8%.

Differences between trends in unit sales and dollar sales could be due, in part, to inflation and the recent increase in large-format disposable e-cigarettes that allow for thousands of puffs. Higher price per device of large-format disposable e-cigarettes might account for declines in unit sales without comparable declines in dollar sales.

Figure 3. National Trends: Total Nicotine Sold (in Milligrams) by Flavor of E-Cigarette

■ Menthol
 ■ Mint
 ■ All Other Flavors [†]
■ Tobacco-Flavored
 ■ Clear/Other Cooling [†]
■ Unknown

* Sales data do not reflect sales from vape shops or online retailers; dates represent end of 4-week periods; e-cigarette accessories and devices sold without e-liquids were excluded (1.4% of total dollar sales in 2025). Total nicotine sold (mg) was calculated for each product by multiplying the e-liquid volume (mL) by the nicotine concentration (mg/mL) and the unit sales, then summing the results across all e-cigarette products sold. For products labeled with nicotine concentration as a percentage, the reported value was multiplied by 10 to convert it to mg/mL. This conversion assumes an e-liquid density of 1 g/mL, a conservative lower-bound estimate for e-liquid density. Consequently, estimates of total nicotine sales (mg) may be understated.

** Sales estimates from 2019 reflect preserved data from custom CDC Foundation analyses using archived Circana data that are no longer updated or included in Circana's current sales projections.

[†] "All other flavors" category includes fruit, clove/spice, chocolate, alcoholic drink (e.g., wine, cognac or other cocktails), candy/desserts/other sweets, some other flavor; "clear/other cooling" category includes products with flavor names such as clear, clear ice or unflavored, which likely contain non-menthol synthetic cooling agents (e.g., Flum Pebble Clear, EB Design BC5000 Clear) and which observe an increase in sales following California's flavored tobacco product sales restrictions beginning December 2022.

Trends of Total Nicotine Sold (in Milligrams) by Flavor of E-Cigarette Following FDA's 2020 Flavor Enforcement Policy

From 2/2/2020 to 6/14/2026, unless otherwise specified

The total amount of e-cigarette nicotine sold per month increased from 2.7 billion to 9.0 billion milligrams (+235.3%). This increase was 9.3 times greater than the 25.2% increase in standardized unit sales.

The total amount of nicotine sold in tobacco-flavored e-cigarettes decreased from 841.5 million to 721.2 million milligrams (-14.3%); share of nicotine sold decreased from 31.3% to 8.0%.

The total amount of nicotine sold in non-tobacco-flavored e-cigarettes increased from 1.8 billion to 8.2 billion milligrams (+345.7%); share of nicotine sold increased from 68.7% to 91.3%.

The total amount of nicotine sold in menthol-flavored e-cigarettes increased from 891.8 million to 1.6 billion milligrams (+83.0%); share of nicotine sold decreased from 33.2% to 18.1%.

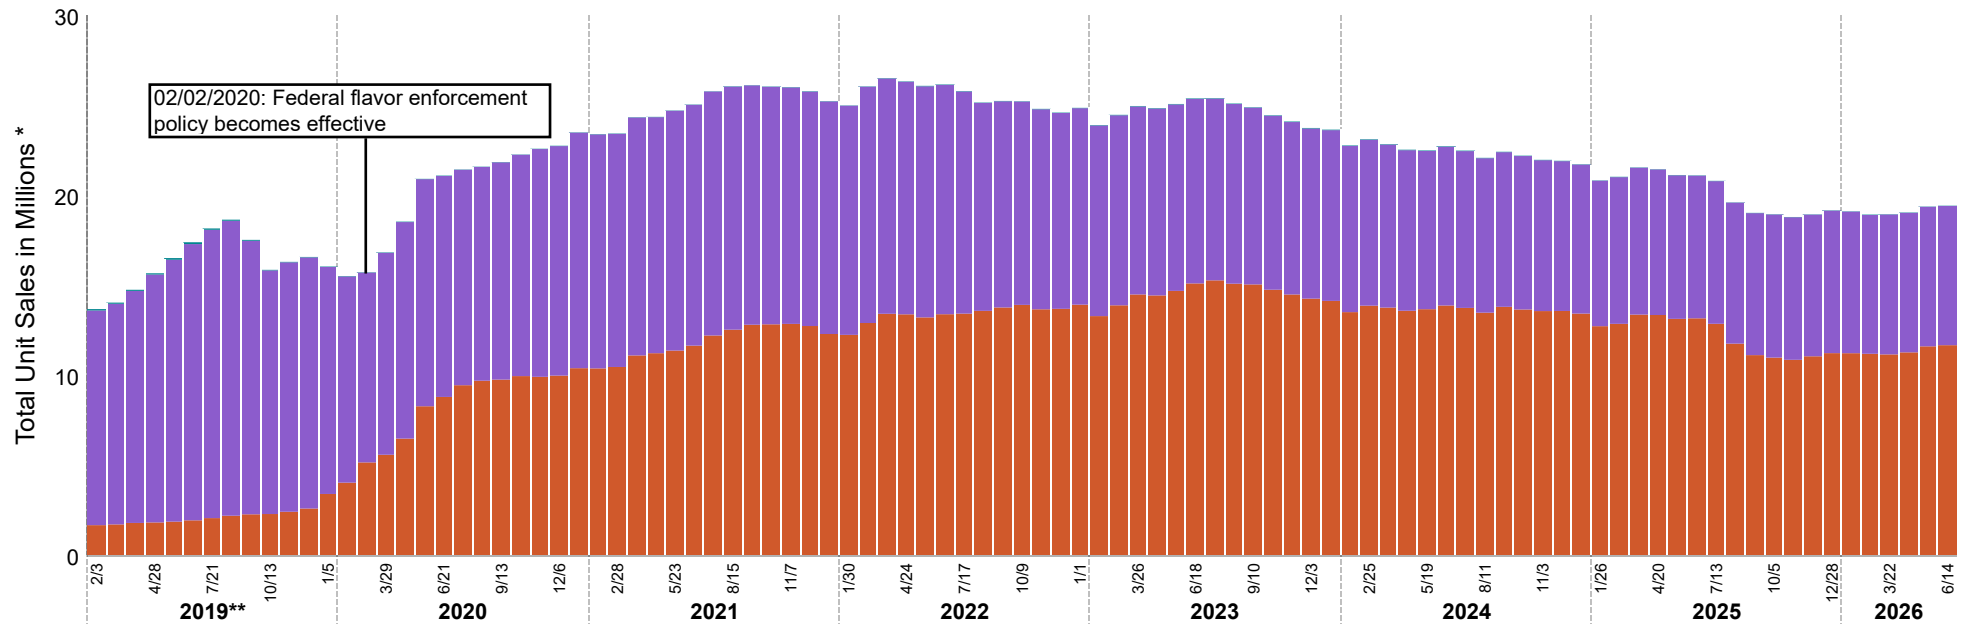

The total amount of nicotine sold in mint-flavored e-cigarettes increased from 186.9 million to 787.4 million milligrams (+321.3%); share of nicotine sold increased from 7.0% to 8.7%.

The total amount of nicotine sold in all other-flavored e-cigarettes increased from 765.6 million to 5.7 billion milligrams (+644.8%); share of nicotine sold increased from 28.5% to 63.3%.

Between 12/4/2022 and 6/14/2026 the total amount of nicotine sold in clear/other cooling flavored e-cigarettes increased from 29.9 million to 101.7 million milligrams (+239.9%); share of nicotine sold increased from 0.4% to 1.1%.

Figure 4. National E-Cigarette Unit Sales by Product Type

Disposable Devices Prefilled Cartridges E-Liquid

* Sales data do not reflect sales from vape shops or online retailers; dates represent end of 4-week periods; e-cigarette accessories and devices sold without e-liquids were excluded (1.4% of total dollar sales in 2025). Unit sales were standardized to reflect the most common package size for each product type. A standardized unit was equal to five prefilled cartridges, one disposable device or one e-liquid bottle.

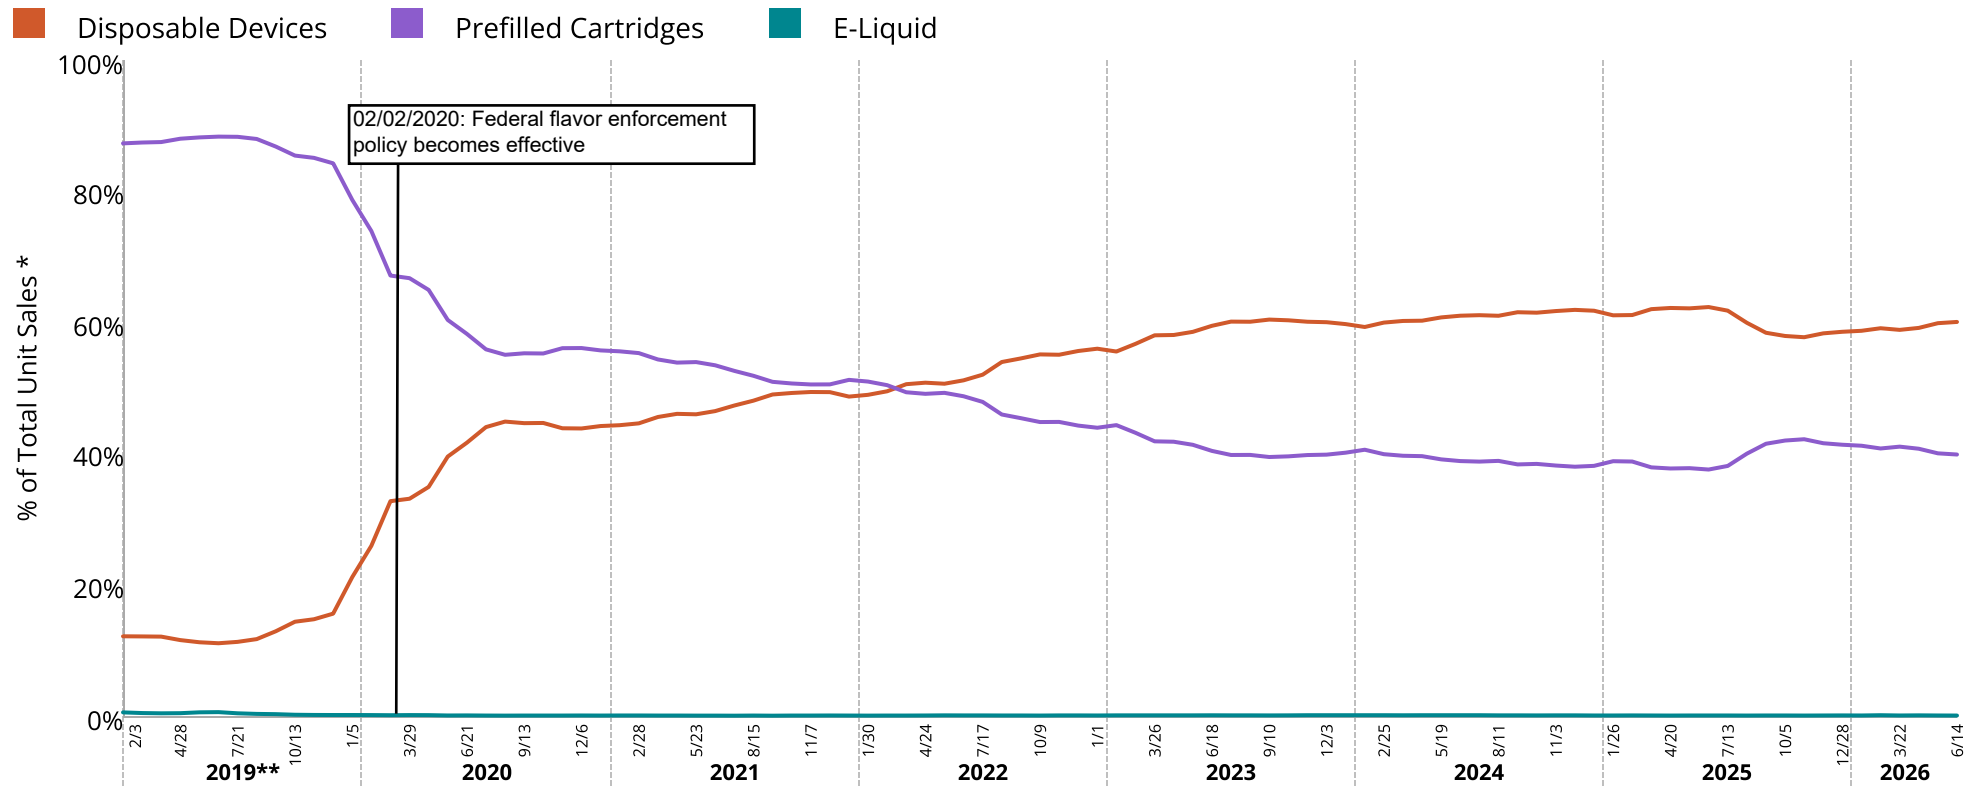

** Sales estimates from 2019 reflect preserved data from custom CDC Foundation analyses using archived Circana data that are no longer updated or included in Circana's current sales projections.

Trends of Unit Sales by Product Following FDA's 2020 Flavor Enforcement Policy

From 2/2/2020 to 6/14/2026

Sales of disposable devices increased from 4.0 million to 11.7 million (+190.0%); unit share increased from 25.9% to 60.1%.

Sales of prefilled cartridges decreased from 11.5 million to 7.7 million (-32.5%); unit share decreased from 73.9% to 39.9%.

Figure 5. National E-Cigarette Unit Share by Product Type

* Sales data do not reflect sales from vape shops or online retailers; dates represent end of 4-week periods; e-cigarette accessories and devices sold without e-liquids were excluded (1.4% of total dollar sales in 2025). Unit sales were standardized to reflect the most common package size for each product type. A standardized unit was equal to five prefilled cartridges, one disposable device or one e-liquid bottle.

Unit Sales Annual Trends by Flavor

From 2024 to 2025

- Annual total e-cigarette unit sales decreased from 291.1 million to 262.2 million (-9.9%).
- Unit sales of tobacco-flavored e-cigarettes decreased from 50.0 million to 48.0 million (-4.1%).
- Unit sales of non-tobacco-flavored e-cigarettes decreased from 238.6 million to 212.5 million (-11.0%).
- Unit sales of menthol-flavored e-cigarettes decreased from 74.3 million to 71.8 million (-3.4%).
- Unit sales of mint-flavored e-cigarettes decreased from 21.6 million to 20.1 million (-6.8%).
- Unit sales of other-flavored e-cigarettes decreased from 139.3 million to 117.1 million (-16.0%).
- Unit sales of clear/other cooling flavored e-cigarettes increased from 3.4 million to 3.5 million (+3.4%).

Unit Share Annual Trends by Flavor

From 2024 to 2025

■ Unit share of tobacco-flavored e-cigarette sales increased from 17.2% to 18.3%.

■ Unit share of non-tobacco-flavored e-cigarette sales decreased from 82.0% to 81.0%.

■ Unit share of menthol-flavored e-cigarette sales increased from 25.5% to 27.4%.

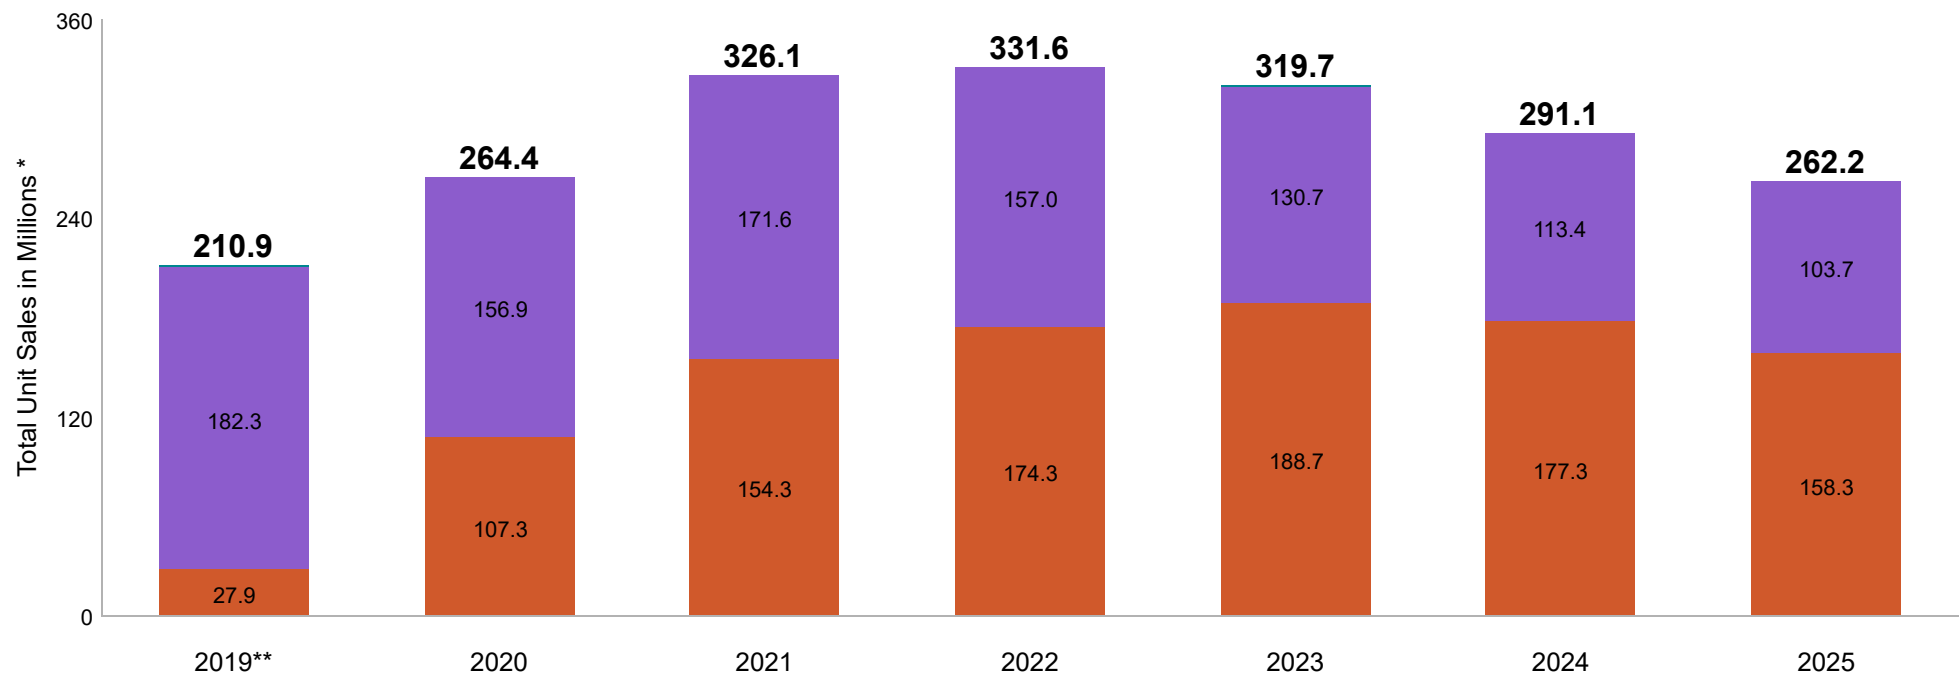

■ Unit share of mint-flavored e-cigarette sales increased from 7.4% to 7.7%.

■ Unit share of other-flavored e-cigarette sales decreased from 47.9% to 44.7%.

■ Unit share of clear/other cooling flavored e-cigarette sales increased from 1.2% to 1.3%.

Figure 9. National E-Cigarette Unit Sales By Product Type, Annual Estimates

Disposable Devices Prefilled Cartridges E-Liquid

* Sales data do not reflect sales from vape shops or online retailers; dates represent end of 4-week periods; e-cigarette accessories and devices sold without e-liquids were excluded (1.4% of total dollar sales in 2025). Unit sales were standardized to reflect the most common package size for each product type. A standardized unit was equal to five prefilled cartridges, one disposable device or one e-liquid bottle.

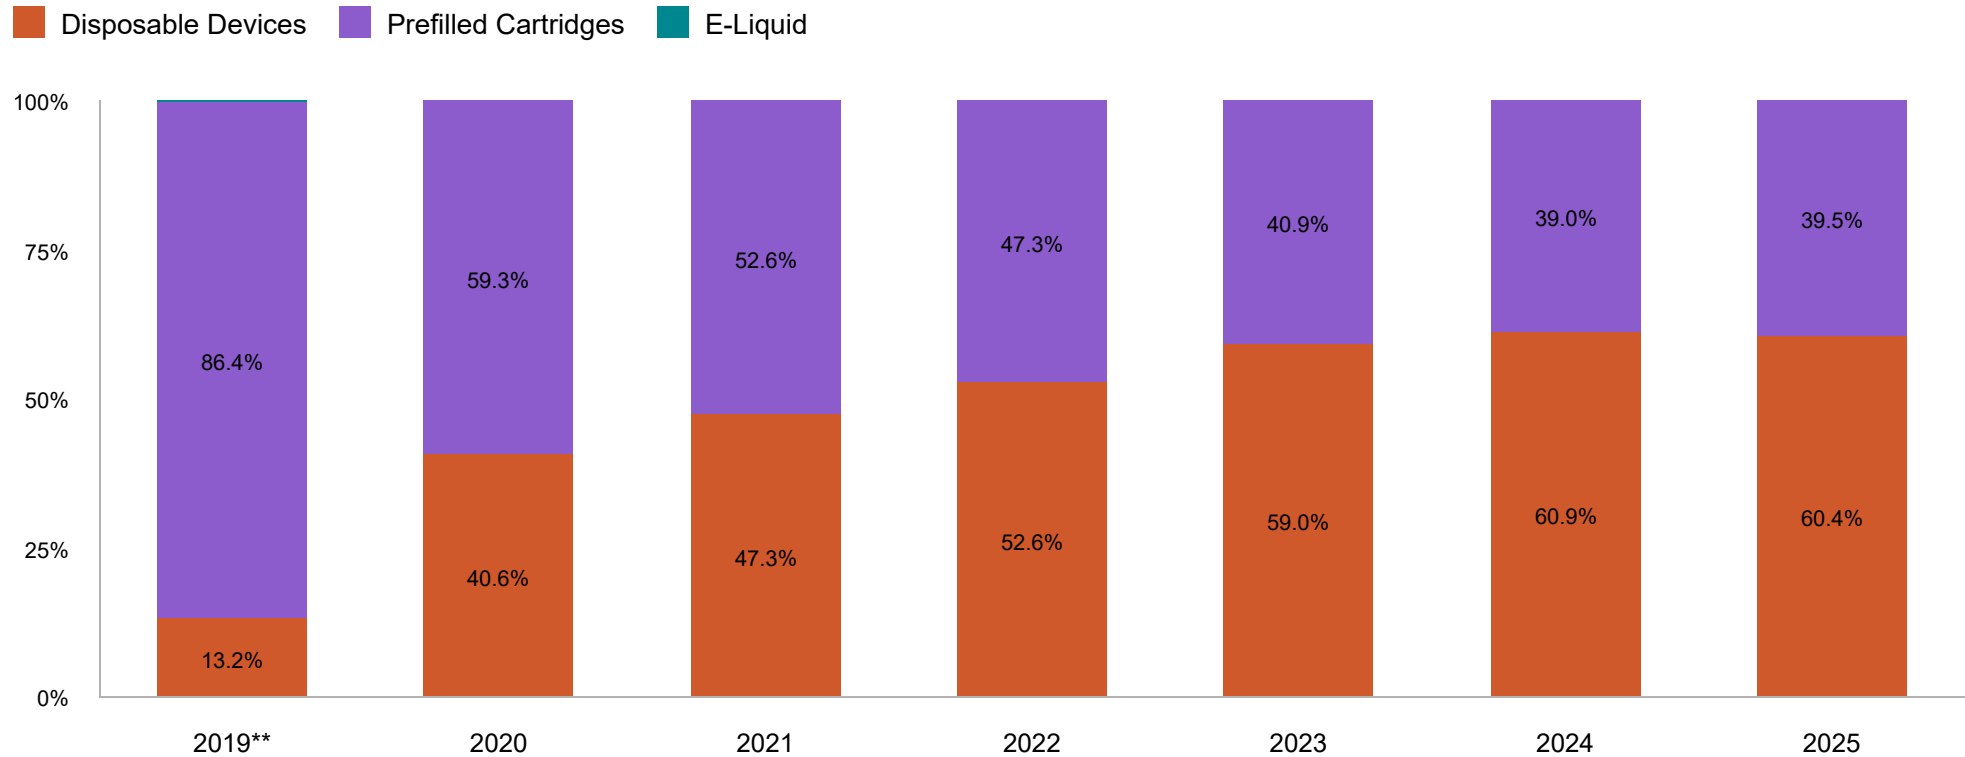

** Sales estimates from 2019 reflect preserved data from custom CDC Foundation analyses using archived Circana data that are no longer updated or included in Circana's current sales projections.

Unit Sales Annual Trends by Product

From 2024 to 2025

- Total e-cigarette unit sales decreased from 291.1 million to 262.2 million (-9.9%).
- Unit sales of disposable e-cigarettes decreased from 177.3 million to 158.3 million (-10.7%).
- Unit sales of prefilled cartridges decreased from 113.4 million to 103.7 million (-8.6%).

Figure 10. Annual Unit Share of National E-Cigarette Unit Sales by Product Type*

* Sales data do not reflect sales from vape shops or online retailers; dates represent end of 4-week periods; e-cigarette accessories and devices sold without e-liquids were excluded (1.4% of total dollar sales in 2025). Unit sales were standardized to reflect the most common package size for each product type. A standardized unit was equal to five prefilled cartridges, one disposable device or one e-liquid bottle.

** Sales estimates from 2019 reflect preserved data from custom CDC Foundation analyses using archived Circana data that are no longer updated or included in Circana's current sales projections.

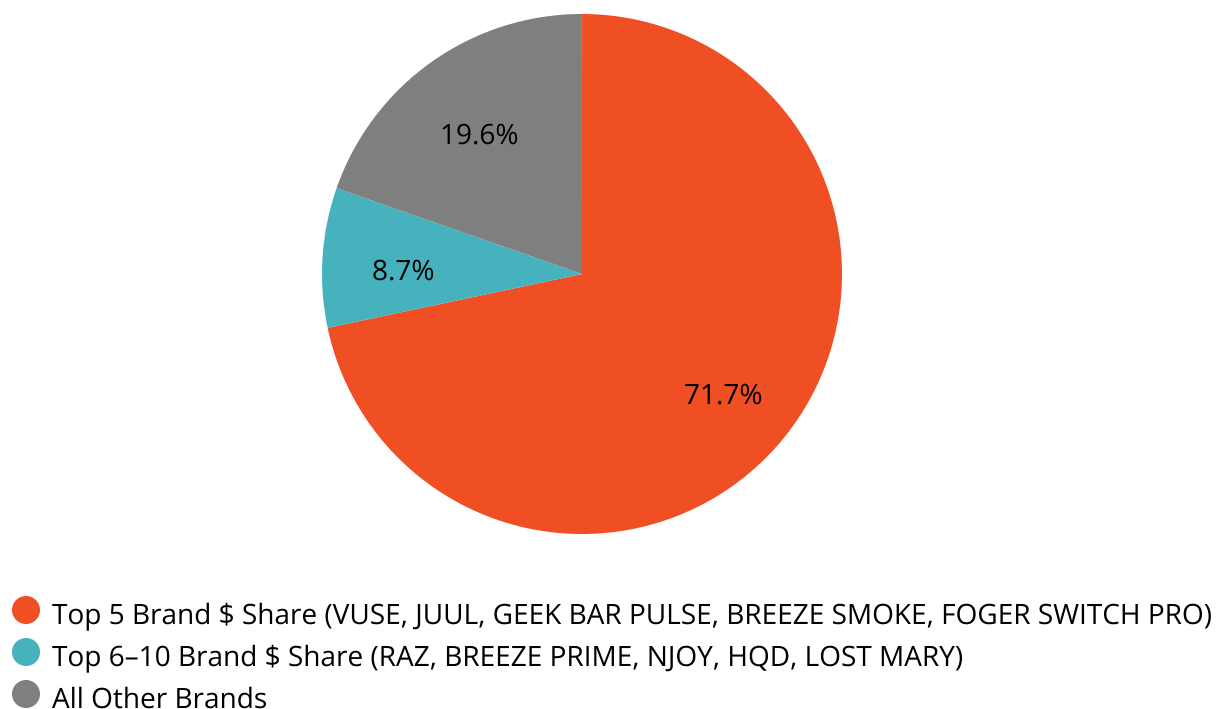

Unit Share Annual Trends by Product

From 2024 to 2025

- Unit share of disposable e-cigarette sales decreased from 60.9% to 60.4%.
- Unit share of prefilled cartridge e-cigarette sales increased from 39.0% to 39.5%.

Figure 11. Dollar Market Share of Top Brands **

Percent Total Market (Dollar) Share*
(Circana Syndicated Category: Electronic Smoking Devices)

* Sales data do not reflect sales from vape shops or online retailers; e-cigarette accessories and devices sold without e-liquids were excluded (1.4% of total dollar sales in 2025).

** Brands included here are presented as they are described within Circana data (therein labelled BrandFranchiseName); the CDC Foundation has not performed additional aggregation. Some brands (such as Vuse) may aggregate several product lines, whereas others (such as Breeze) may be listed separately.

Dollar share by top brand aggregates

During the 12 weeks ending 6/14/2026

The top 10 brands were (in descending order of dollar sales) VUSE, JUUL, GEEK BAR PULSE, BREEZE SMOKE, FOGER SWITCH PRO, RAZ, BREEZE PRIME, NJOY, HQD and LOST MARY.

The top 5 brands and top 10 brands accounted for 71.7% and 80.4% of dollar sales, respectively.

Since the previous e-cigarette sales data brief (data through 3/22/26), RAZ has surpassed BREEZE PRIME in dollar share.
