Monitoring E-Cigarette Sales: State Trends

This data brief highlights trends in e-cigarette unit sales in selected states. Data is presented from February 2019 to June 2026.

Notice of Brief Formatting and Revision to Previous Data Estimates

- For the best viewing experience, please open this PDF in Google Chrome. Some features or formatting may not display correctly in other browsers or PDF viewers.
- The data in this brief have been updated to capture new e-cigarette products coded by Circana (formerly IRI). Historical sales estimates may differ from previous briefs.

Federal Flavor Regulatory Initiatives

- In February 2020, the U.S. Food and Drug Administration (FDA) began prioritizing enforcement of existing regulations against prefilled e-cigarette cartridges in flavors other than tobacco and menthol. This prioritization did not apply to e-liquid bottles or single-use disposable e-cigarettes.
- In May 2026, FDA issued new enforcement guidance indicating they would not prioritize enforcement against certain unauthorized e-cigarettes with pending applications.
- As of September 2026, FDA has authorized 48 e-cigarette products to be marketed in the United States.[1] These are the only products that may lawfully be sold in the United States. Nearly 70 percent of e-cigarette sales in U.S. convenience and grocery stores were unauthorized as of December 2025.[2]

State and Local Legislative Initiatives

- California and Massachusetts restrict the sale of flavored tobacco products; New Jersey restricts the sale of all flavored e-cigarettes; New York restricts the sale of flavored e-cigarettes unless they have marketing authorization from the FDA; and Rhode Island and Utah restrict the sale of flavored e-cigarettes, except menthol. In addition, more than 400 local jurisdictions restrict the sale of flavored tobacco products, including e-cigarettes, as of September 2026.
- More information about state and local policies can be found at www.truthinitiative.org/research-resources/emerging-tobacco-products/local-restrictions-flavored-tobacco-and-e-cigarette.

Other Relevant Issues

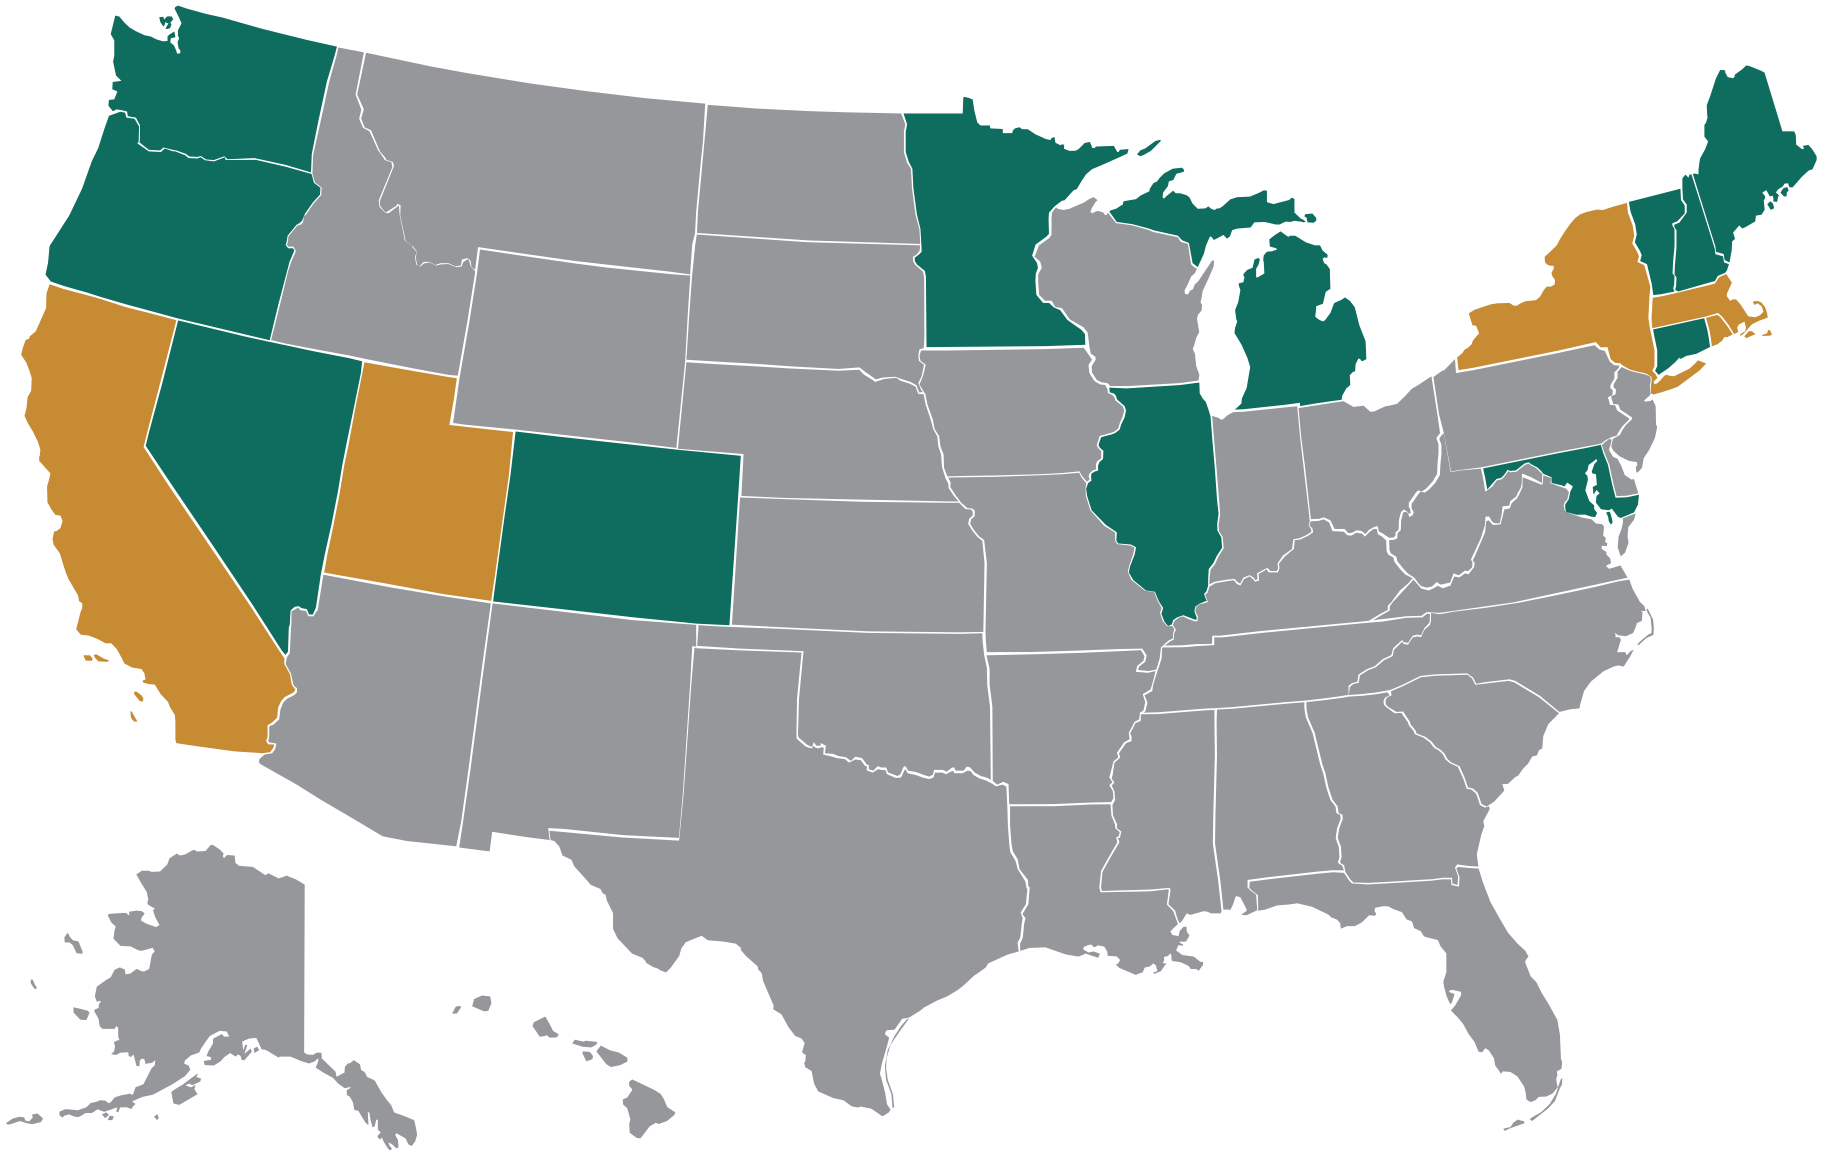

- During the period covered by this data brief, additional flavored tobacco products continued to be marketed (e.g., flavored cigars) or entered the market (e.g., nicotine pouches).
- Units of e-cigarettes are not adjusted to account for variations in unit size. Large-format disposable e-cigarettes that allow for thousands of “puffs” are now available. Declines in unit sales may not signify declines in prevalence of use or consumption. Please see www.tobaccomonitoring.org for more information about the total amount of e-cigarette nicotine sold in each of the states for which unit sales are presented in this data brief.
- Following California’s prohibition of flavored tobacco product sales in December 2022, sales of products branded as clear, clear ice and unflavored, likely containing non-menthol synthetic cooling agents, increased (e.g., Flum Pebble Clear, EB Design BC5000 Clear). These products are categorized as Clear/Other Cooling in this data brief.
- The e-cigarette or vaping product use-associated lung injury (EVALI) outbreak in late 2019 and COVID-19 pandemic may have affected e-cigarette sales.

2. Schoute V, Kittle A, Crane E, et al. Sales of Unauthorized E-Cigarettes in the United States, December 2025. *NEJM Evidence* Published Online First: 11 August 2026. doi: 10.1056/EVIDpha2600137.

Retail sales data are based on custom research by the CDC Foundation using Circana retail POS (Multi-Outlet+ and Convenience). Financial support was provided by Bloomberg Philanthropies through a grant to the CDC Foundation. The findings and conclusions in this report are those of the authors and do not necessarily represent the official position of the CDC Foundation. According to Circana, new product coding is managed to consistently meet or exceed releasing products that cover a minimum of 95.5% of total dollar sales at any given time. To account for the remaining share, Circana applies projection algorithms that ensure the released data is representative of both total U.S. and state-level sales.

Figure 1. California E-Cigarette Unit Sales by Flavor

* Sales data do not reflect sales from vape shops or online retailers; dates represent end of 4-week periods; e-cigarette accessories and devices sold without e-liquids were excluded (1.4% of total dollar sales in 2025). Unit sales were standardized to reflect the most common package size for each product type. A standardized unit was equal to five prefilled cartridges, one disposable device or one e-liquid bottle.

** Sales estimates from 2019 reflect preserved data from custom CDC Foundation analyses using archived Circana data that are no longer updated or included in Circana's current sales projections.

† "All other flavors" category includes fruit, clove/spice, chocolate, alcoholic drink (e.g., wine, cognac or other cocktails), candy/desserts/other sweets, some other flavor; "clear/other cooling" category includes products with flavor names such as clear, clear ice or unflavored, which likely contain non-menthol synthetic cooling agents (e.g., Flum Pebble Clear, EB Design BC5000 Clear) and which observe an increase in sales following California's flavored tobacco product sales restrictions beginning December 2022.

Trends of Unit Sales by Flavor Following California's Flavored E-Cigarette Restriction

From 12/4/2022 to 6/14/2026, unless otherwise specified

Following California's implementation of flavored tobacco restrictions, monthly e-cigarette total unit sales decreased from 835.7 thousand to 288.7 thousand (-65.5%).

Tobacco-flavored e-cigarette sales increased from 204.2 thousand to 248.9 thousand (+21.9%); unit share increased from 24.4% to 86.2%.

Non-tobacco-flavored e-cigarette sales decreased from 628.4 thousand to 39.3 thousand (-93.7%); unit share decreased from 75.2% to 13.6%.

Menthol-flavored e-cigarette sales decreased from 209.5 thousand to 6.1 thousand (-97.1%); unit share decreased from 25.1% to 2.1%.

Mint-flavored e-cigarette sales decreased from 67.9 thousand to 2.7 thousand (-96.0%); unit share decreased from 8.1% to 0.9%.

All other-flavored e-cigarette sales decreased from 343.5 thousand to 24.0 thousand (-93.0%); unit share decreased from 41.1% to 8.3%.

Clear/other cooling flavored e-cigarette sales decreased from 7.4 thousand to 6.6 thousand (-11.5%); unit share increased from 0.9% to 2.3%.

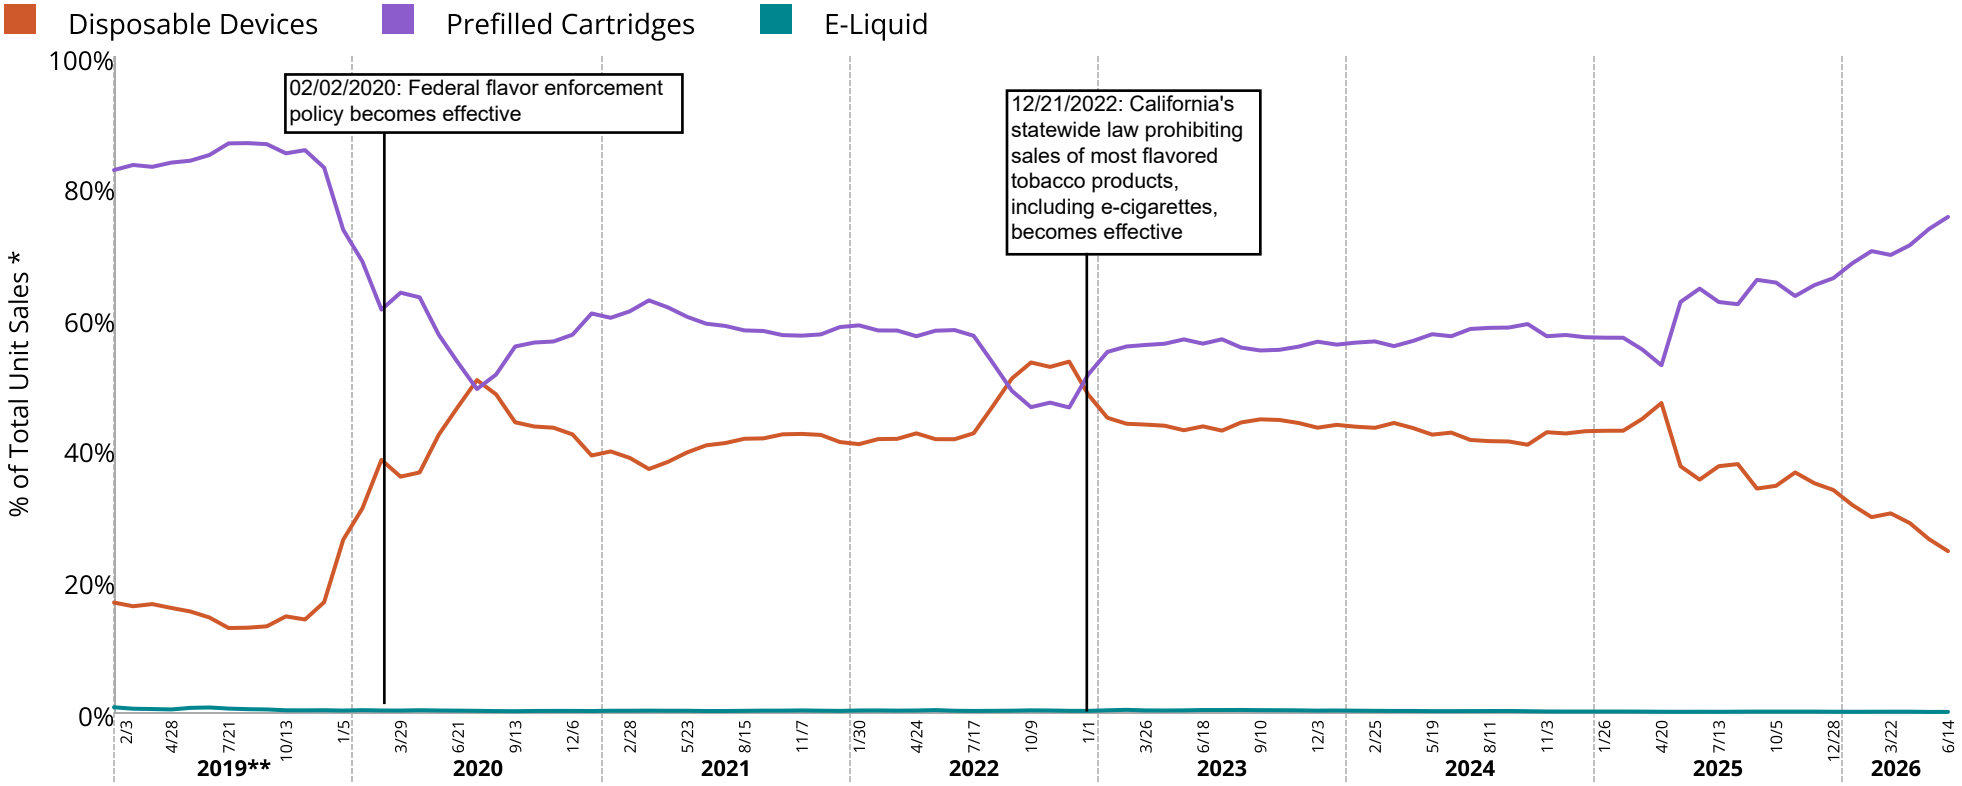

California's decline in e-cigarette sales between 12/4/2022 and 6/14/2026 represents 10.6% (i.e., 547.0 thousand units out of 5.2 million units) of the decline in national e-cigarette sales that occurred during this period.

As of 6/14/2026, disposable e-cigarettes represent 88.4% of sales of prohibited flavored e-cigarettes in California.

Retail sales data are based on custom research by the CDC Foundation using Circana retail POS (Multi-Outlet+ and Convenience). Financial support was provided by Bloomberg Philanthropies through a grant to the CDC Foundation. The findings and conclusions in this report are those of the authors and do not necessarily represent the official position of the CDC Foundation. According to Circana, new product coding is managed to consistently meet or exceed releasing products that cover a minimum of 95.5% of total dollar sales at any given time. To account for the remaining share, Circana applies projection algorithms that ensure the released data is representative of both total U.S. and state-level sales.

Figure 2. California E-Cigarette Unit Share by Product Type

* Sales data do not reflect sales from vape shops or online retailers; dates represent end of 4-week periods; e-cigarette accessories and devices sold without e-liquids were excluded (1.4% of total dollar sales in 2025). Unit sales were standardized to reflect the most common package size for each product type. A standardized unit was equal to five prefilled cartridges, one disposable device or one e-liquid bottle.

** Sales estimates from 2019 reflect preserved data from custom CDC Foundation analyses using archived Circana data that are no longer updated or included in Circana's current sales projections.

Trends of Unit Sales by Product Type Following California's Flavored E-Cigarette Restriction

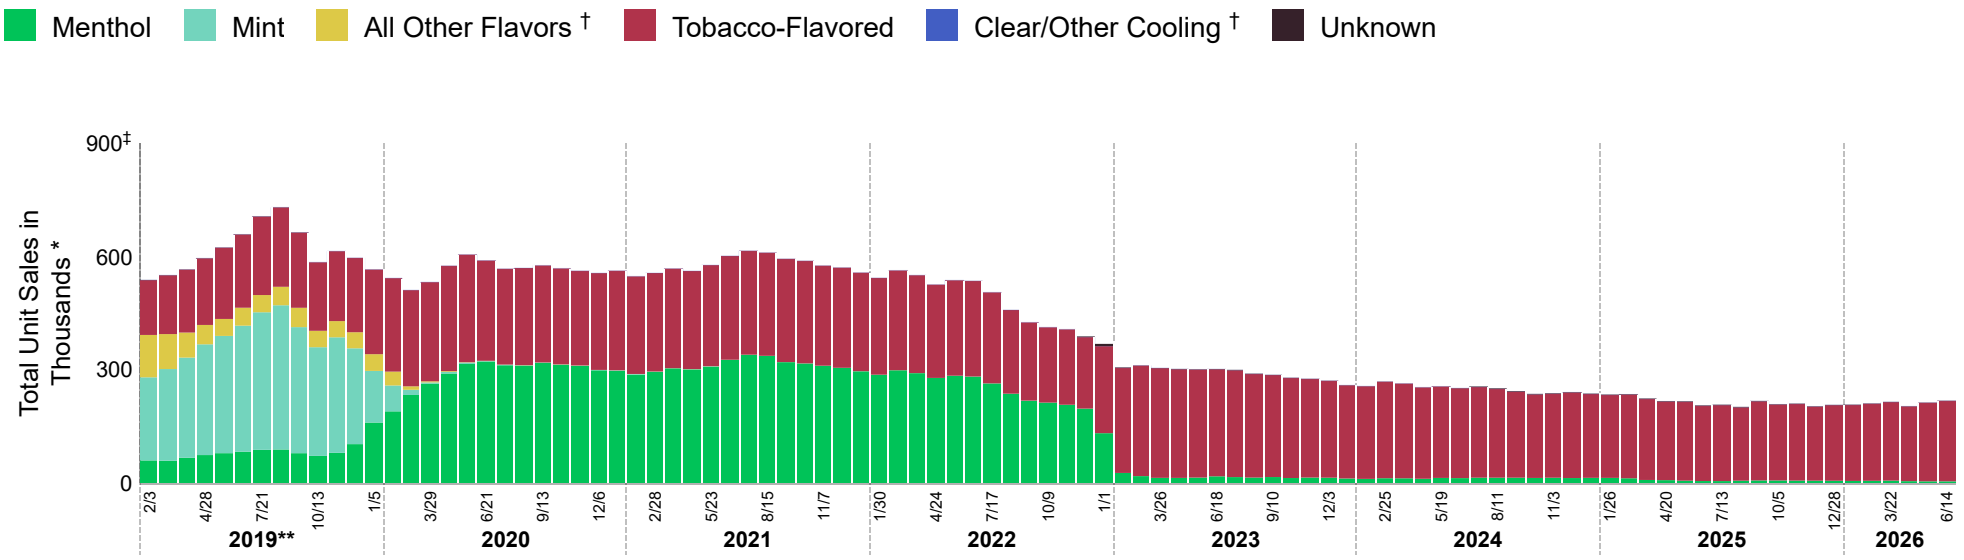

From 12/4/2022 to 6/14/2026

- Unit share of disposable devices decreased from 53.4% to 24.5%; unit sales decreased from 446.3 thousand to 70.8 thousand (-84.1%).
- Unit share of prefilled cartridges increased from 46.4% to 75.5%; unit sales decreased from 387.9 thousand to 217.8 thousand (-43.8%).

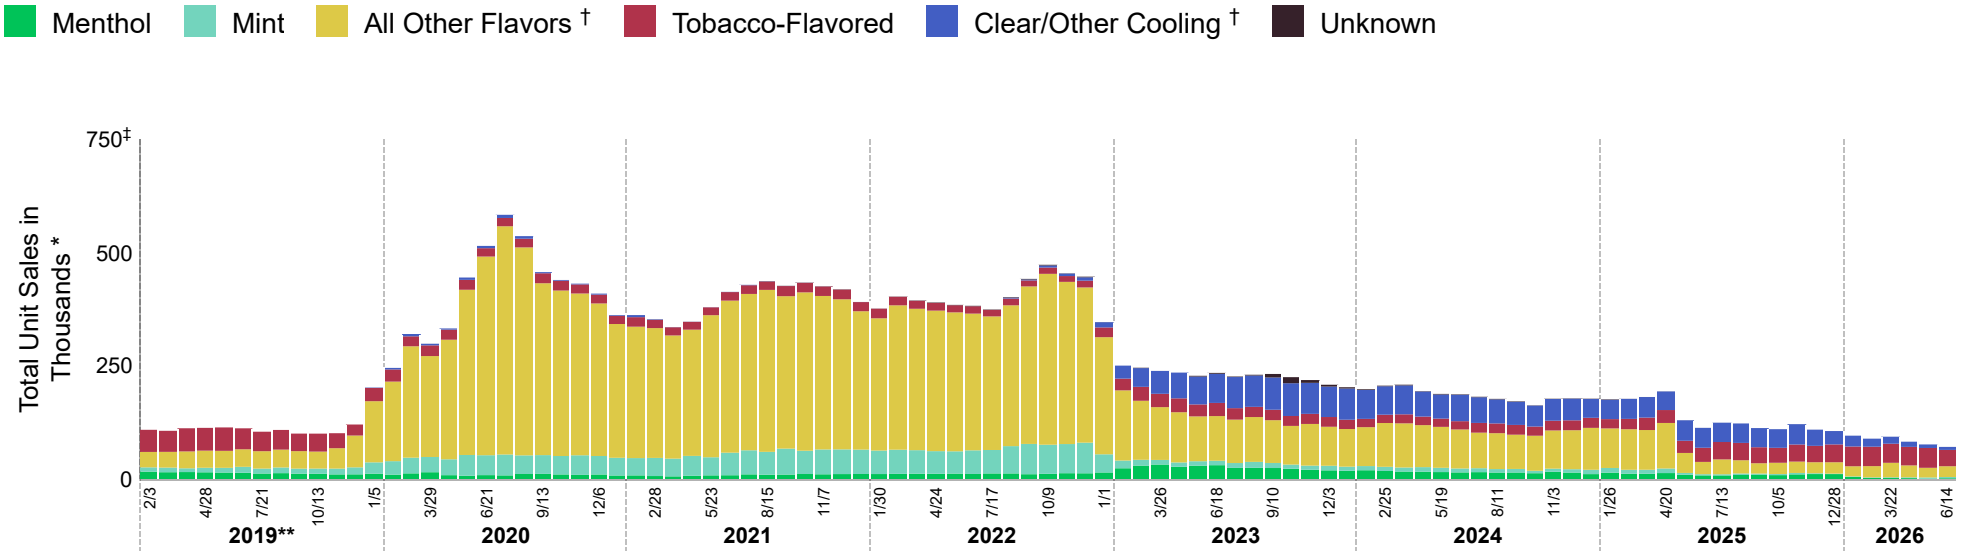

Retail sales data are based on custom research by the CDC Foundation using Circana retail POS (Multi-Outlet+ and Convenience). Trends of Unit Sales by Flavor Following FDA's 2020 Flavor Enforcement Policy

From 2/2/2020 to 6/14/2026, unless otherwise specified

Following FDA's 2020 flavor enforcement policy, monthly e-cigarette total unit sales decreased from 314.1 thousand to 221.1 thousand (-29.6%).

Tobacco-flavored e-cigarette sales decreased from 116.5 thousand to 75.9 thousand (-34.9%); unit share decreased from 37.1% to 34.3%.

Non-tobacco-flavored e-cigarette sales decreased from 197.6 thousand to 144.4 thousand (-27.0%); unit share increased from 62.9% to 65.3%.

Menthol-flavored e-cigarette sales increased from 111.4 thousand to 113.0 thousand (+1.4%); unit share increased from 35.5% to 51.1%.

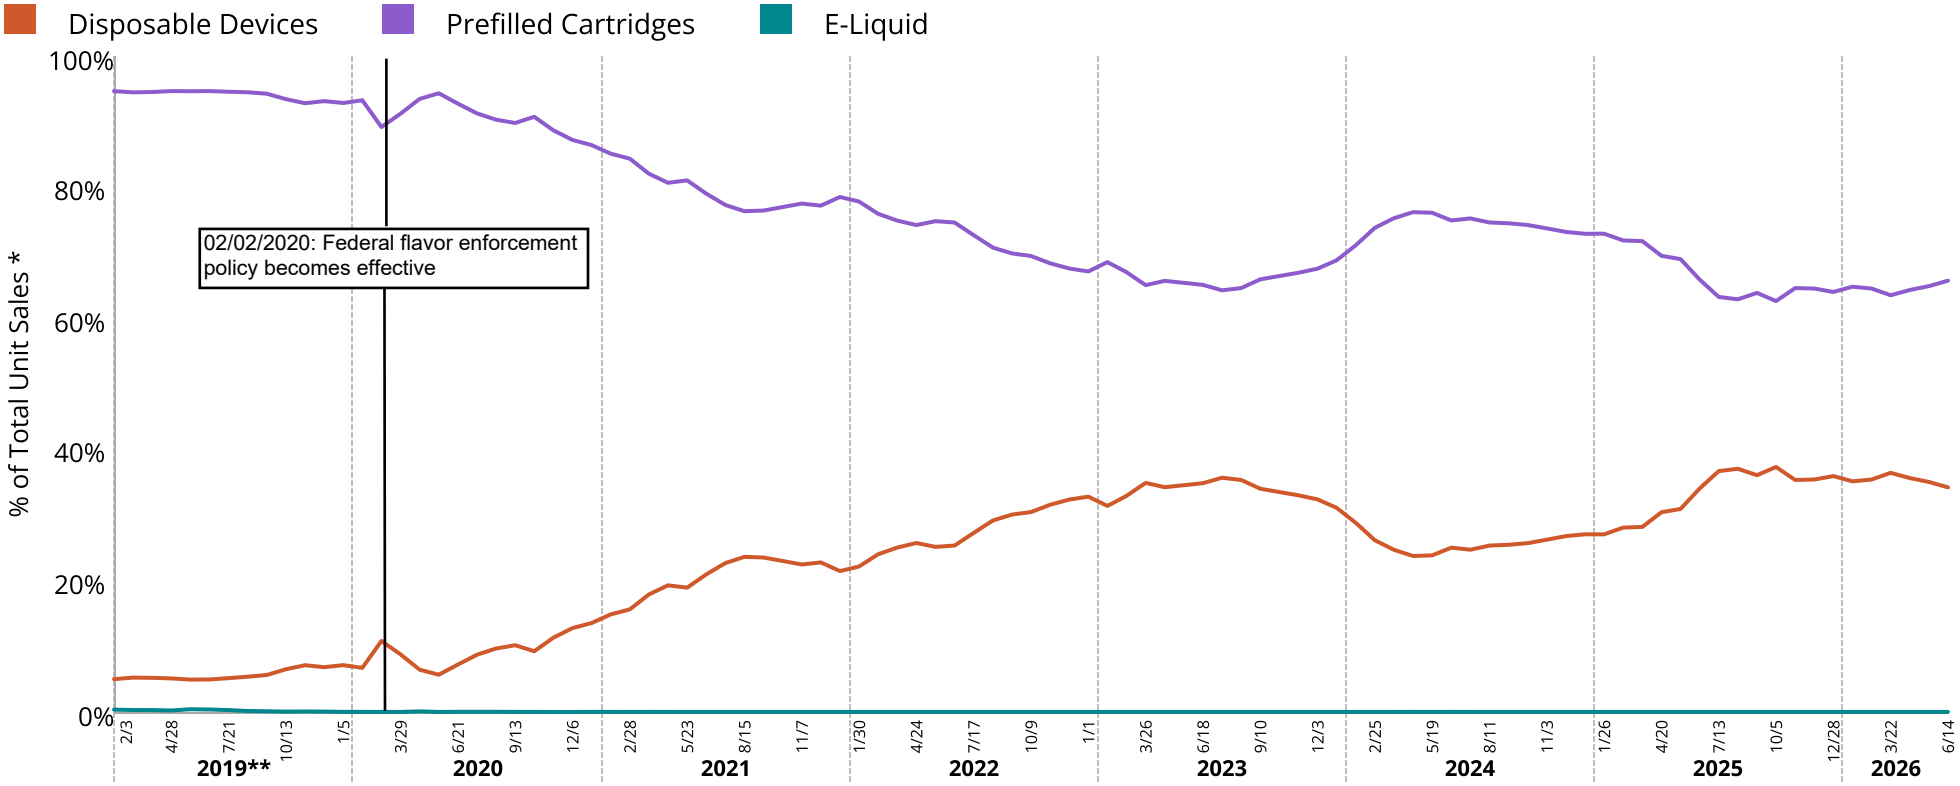

Mint-flavored e-cigarette sales decreased from 24.8 thousand to 4.8 thousand (-80.9%); unit share decreased from 7.9% to 2.1%.

All other-flavored e-cigarette sales decreased from 61.4 thousand to 26.5 thousand (-56.7%); unit share decreased from 19.5% to 12.0%.

Nationally, sales of novel clear and other-cooling flavored e-cigarettes increased starting around December 2022. In Colorado, between 12/4/2022 and 6/14/2026, clear/other cooling flavored e-cigarette sales decreased from 1.1 thousand to 50; unit share decreased from 0.3% to 0.0%.

Retail sales data are based on custom research by the CDC Foundation using Circana retail POS (Multi-Outlet+ and Convenience). Trends of Unit Sales by Flavor Following FDA's 2020 Flavor Enforcement Policy

From 2/2/2020 to 6/14/2026, unless otherwise specified

Following FDA's 2020 flavor enforcement policy, monthly e-cigarette total unit sales increased from 299.1 thousand to 340.3 thousand (+13.8%).

Tobacco-flavored e-cigarette sales decreased from 57.1 thousand to 45.8 thousand (-19.7%); unit share decreased from 19.1% to 13.5%.

Non-tobacco-flavored e-cigarette sales increased from 242.0 thousand to 293.4 thousand (+21.2%); unit share increased from 80.9% to 86.2%.

Menthol-flavored e-cigarette sales decreased from 77.7 thousand to 70.7 thousand (-8.9%); unit share decreased from 26.0% to 20.8%.

Mint-flavored e-cigarette sales increased from 34.8 thousand to 73.8 thousand (+112.3%); unit share increased from 11.6% to 21.7%.

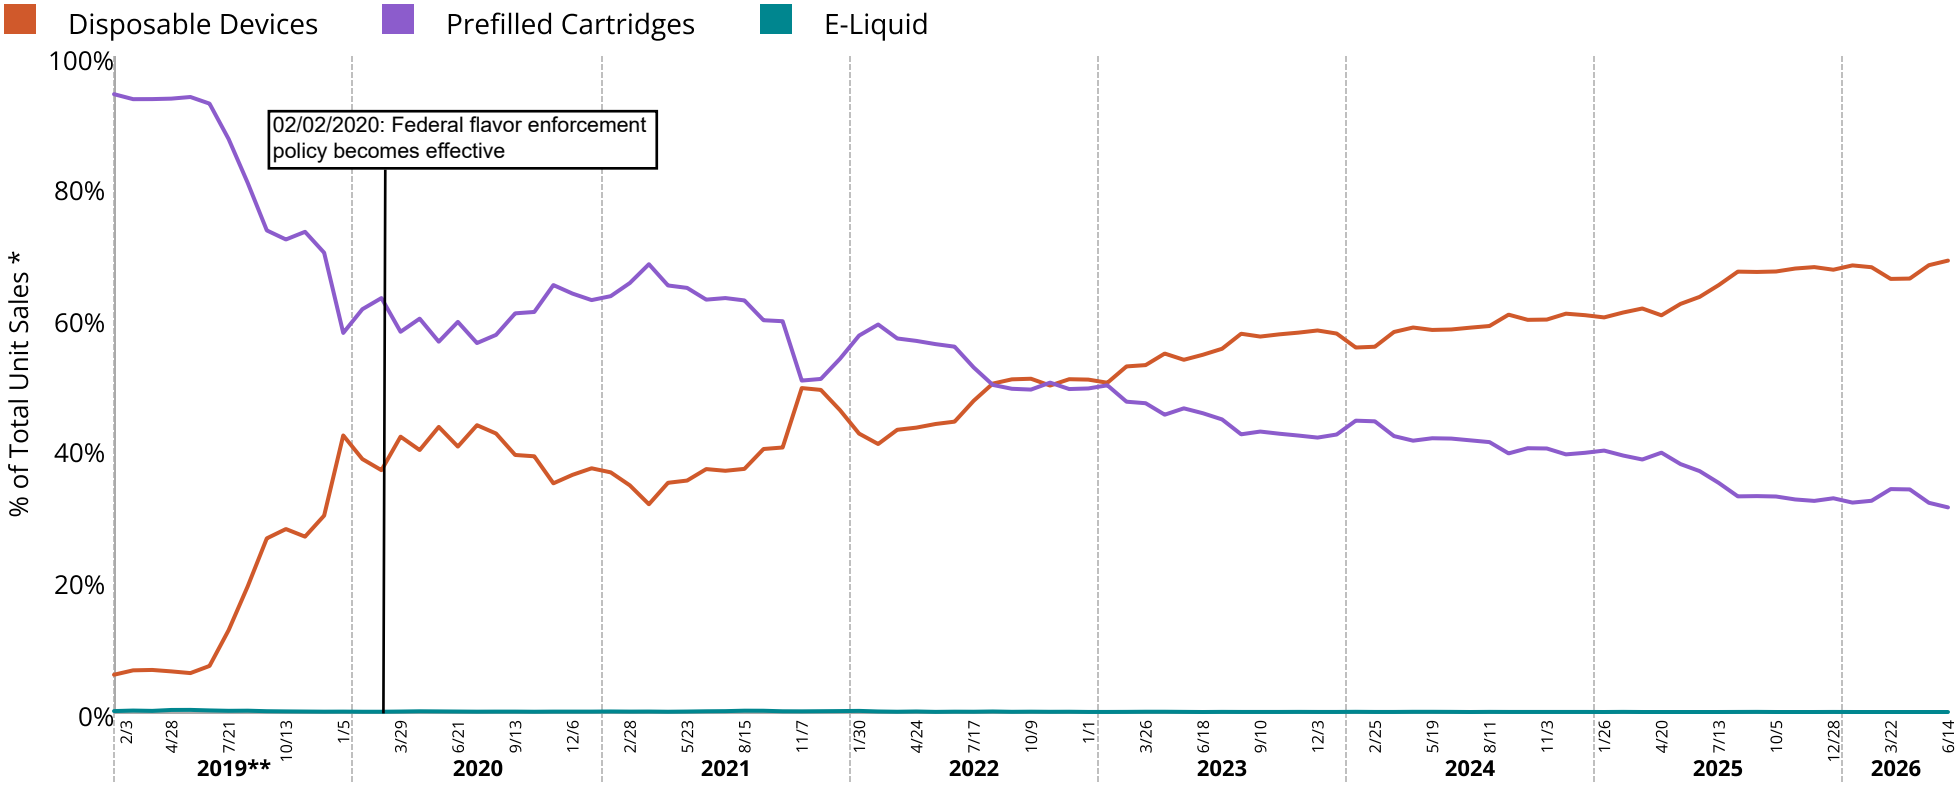

All other-flavored e-cigarette sales increased from 129.6 thousand to 147.9 thousand (+14.1%); unit share increased from 43.3% to 43.5%.

Nationally, sales of novel clear and other-cooling flavored e-cigarettes increased starting around December 2022. In Connecticut, between 12/4/2022 and 6/14/2026, clear/other cooling flavored e-cigarette sales increased from 371 to 992 (+167.4%); unit share increased from 0.1% to 0.3%.

Retail sales data are based on custom research by the CDC Foundation using Circana retail POS (Multi-Outlet+ and Convenience). Financial support was provided by Bloomberg Philanthropies through a grant to the CDC Foundation. The findings and conclusions in this report are those of the authors and do not necessarily represent the official position of the CDC Foundation. According to Circana, new product coding is managed to consistently meet or exceed releasing products that cover a minimum of 95.5% of total dollar sales at any given time. To account for the remaining share, Circana applies projection algorithms that ensure the released data is representative of both total U.S. and state-level sales.

Together our impact is greater

Figure 13. Maine E-Cigarette Unit Sales by Flavor

* Sales data do not reflect sales from vape shops or online retailers; dates represent end of 4-week periods; e-cigarette accessories and devices sold without e-liquids were excluded (1.4% of total dollar sales in 2025). Unit sales were standardized to reflect the most common package size for each product type. A standardized unit was equal to five prefilled cartridges, one disposable device or one e-liquid bottle.

** Sales estimates from 2019 reflect preserved data from custom CDC Foundation analyses using archived Circana data that are no longer updated or included in Circana's current sales projections.

† "All other flavors" category includes fruit, clove/spice, chocolate, alcoholic drink (e.g., wine, cognac or other cocktails), candy/desserts/other sweets, some other flavor; "clear/other cooling" category includes products with flavor names such as clear, clear ice or unflavored, which likely contain non-menthol synthetic cooling agents (e.g., Flum Pebble Clear, EB Design BC5000 Clear) and which observe an increase in sales following California's flavored tobacco product sales restrictions beginning December 2022.

Trends of Unit Sales by Flavor Following FDA's 2020 Flavor Enforcement Policy

From 2/2/2020 to 6/14/2026, unless otherwise specified

Following FDA's 2020 flavor enforcement policy, monthly e-cigarette total unit sales decreased from 79.3 thousand to 69.1 thousand (-12.8%).

Tobacco-flavored e-cigarette sales decreased from 21.7 thousand to 21.5 thousand (-0.8%); unit share increased from 27.4% to 31.2%.

Non-tobacco-flavored e-cigarette sales decreased from 57.5 thousand to 46.4 thousand (-19.4%); unit share decreased from 72.6% to 67.1%.

Menthol-flavored e-cigarette sales increased from 33.8 thousand to 36.0 thousand (+6.5%); unit share increased from 42.7% to 52.1%.

Mint-flavored e-cigarette sales decreased from 5.2 thousand to 1.5 thousand (-71.8%); unit share decreased from 6.6% to 2.1%.

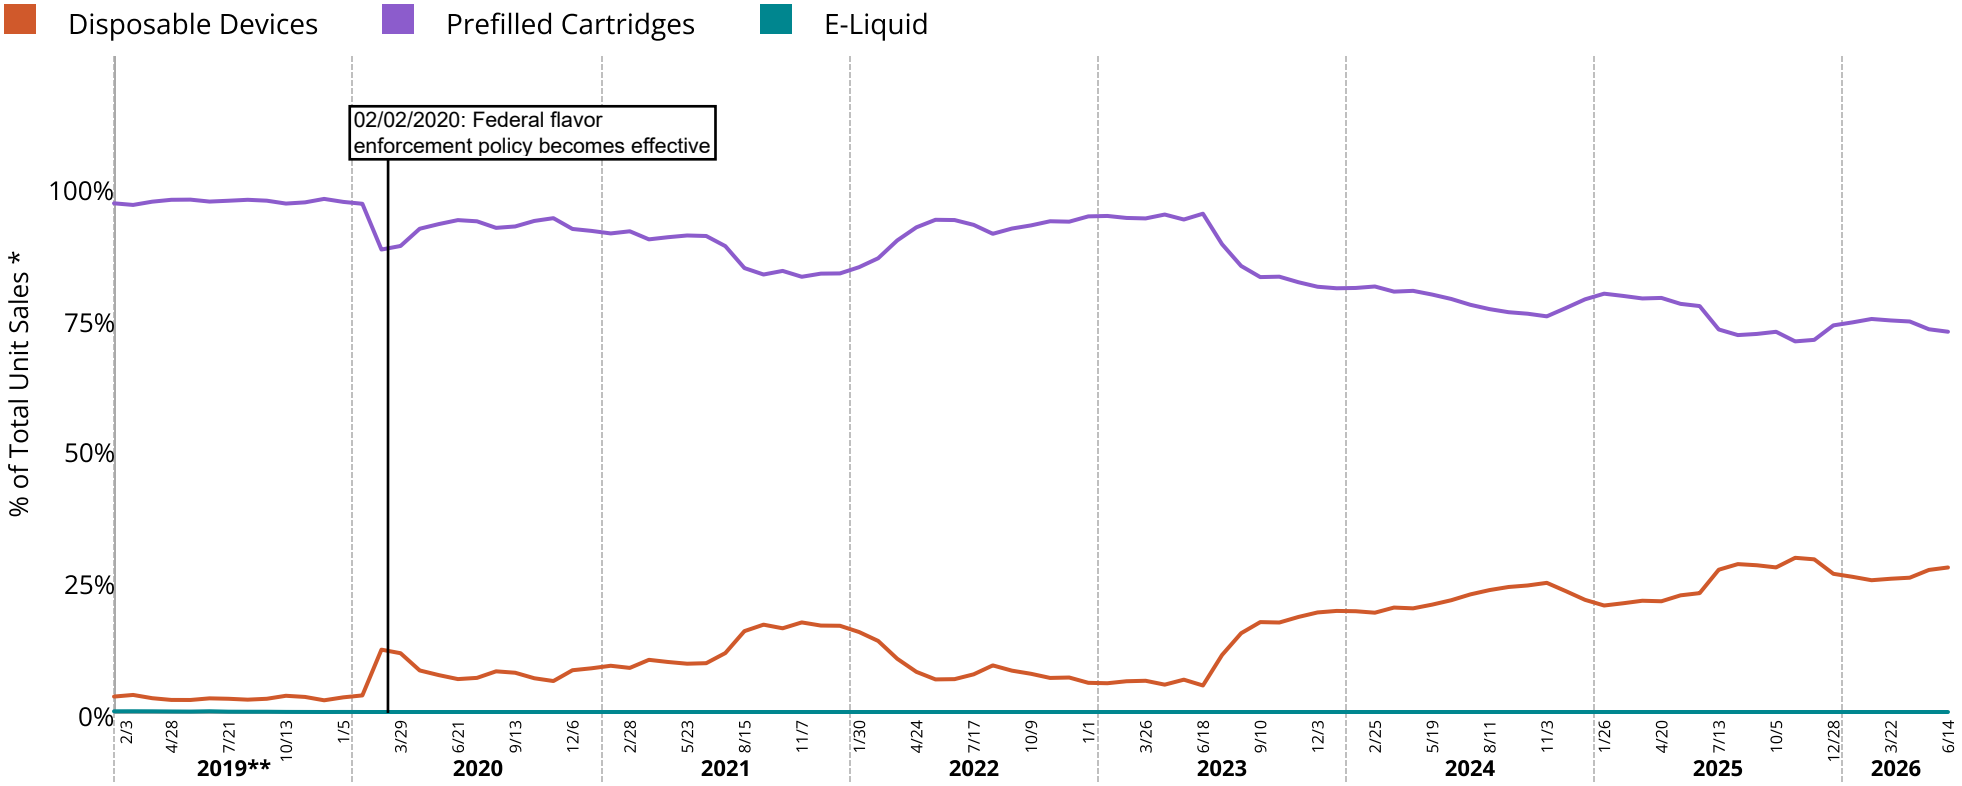

All other-flavored e-cigarette sales decreased from 18.5 thousand to 8.9 thousand (-51.9%); unit share decreased from 23.4% to 12.9%.

Nationally, sales of novel clear and other-cooling flavored e-cigarettes increased starting around December 2022. In Maine, between 12/4/2022 and 6/14/2026, clear/other cooling flavored e-cigarette sales were approximately zero.

Retail sales data are based on custom research by the CDC Foundation using Circana retail POS (Multi-Outlet+ and Convenience). Financial support was provided by Bloomberg Philanthropies through a grant to the CDC Foundation. The findings and conclusions in this report are those of the authors and do not necessarily represent the official position of the CDC Foundation. Figure 26. Minnesota E-Cigarette Unit Share by Product Type

* Sales data do not reflect sales from vape shops or online retailers; dates represent end of 4-week periods; e-cigarette accessories and devices sold without e-liquids were excluded (1.4% of total dollar sales in 2025). Unit sales were standardized to reflect the most common package size for each product type. A standardized unit was equal to five prefilled cartridges, one disposable device or one e-liquid bottle.

** Sales estimates from 2019 reflect preserved data from custom CDC Foundation analyses using archived Circana data that are no longer updated or included in Circana's current sales projections.

Trends of Unit Sales by Product Type Following FDA's 2020 Flavor Enforcement Policy

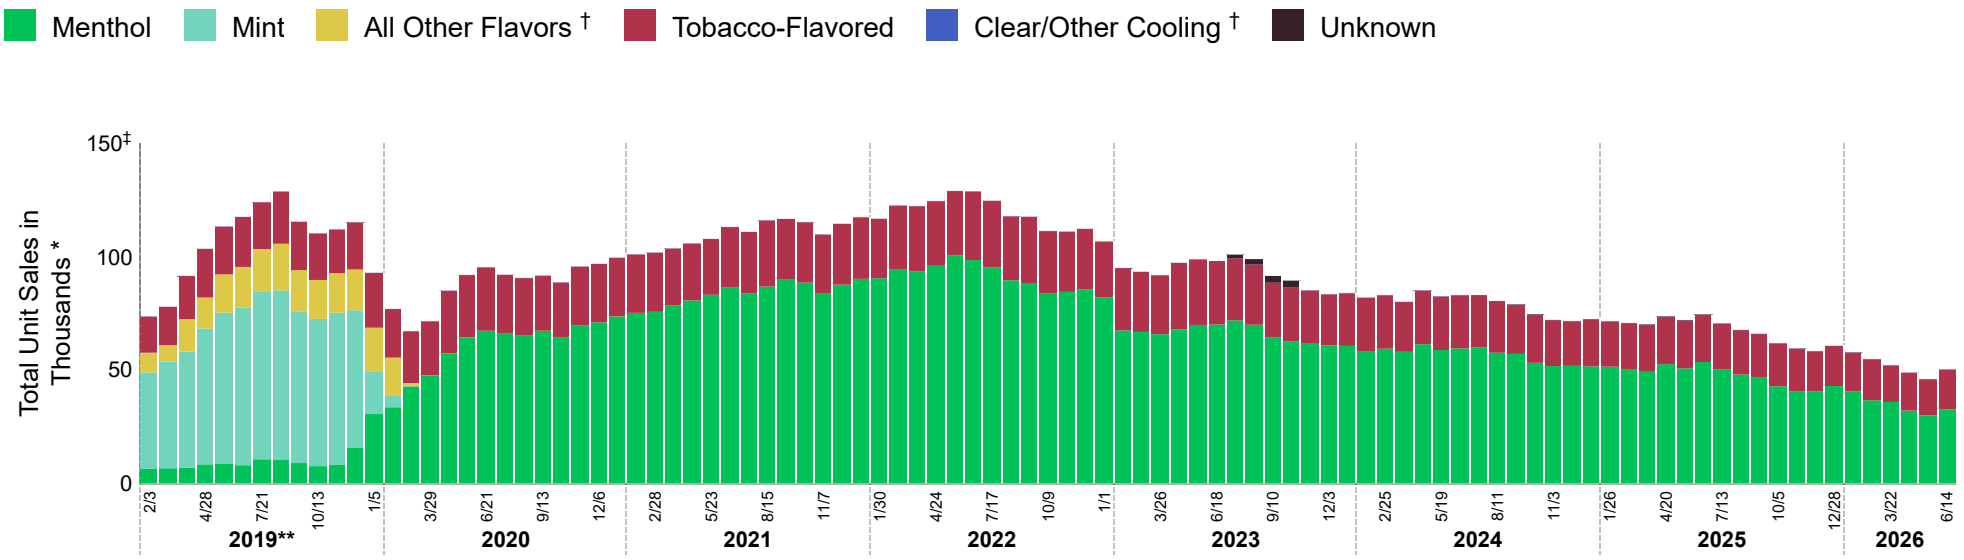

From 2/2/2020 to 6/14/2026

- Unit share of disposable devices increased from 22.1% to 81.5%; unit sales increased from 18.2 thousand to 104.9 thousand (+477.2%).
- Unit share of prefilled cartridges decreased from 77.9% to 18.5%; unit sales decreased from 64.0 thousand to 23.8 thousand (-62.7%).

Retail sales data are based on custom research by the CDC Foundation using Circana retail POS (Multi-Outlet+ and Convenience). Financial support was provided by Bloomberg Philanthropies through a grant to the CDC Foundation. The findings and conclusions in this report are those of the authors and do not necessarily represent the official position of the CDC Foundation. According to Circana, new product coding is managed to consistently meet or exceed releasing products that cover a minimum of 95.5% of total dollar sales at any given time. To account for the remaining share, Circana applies projection algorithms that ensure the released data is representative of both total U.S. and state-level sales.

Trends of Unit Sales by Flavor Following FDA's 2020 Flavor Enforcement Policy

From 2/2/2020 to 6/14/2026, unless otherwise specified

Following FDA's 2020 flavor enforcement policy, monthly e-cigarette total unit sales decreased from 97.8 thousand to 80.0 thousand (-18.2%).

Tobacco-flavored e-cigarette sales decreased from 29.6 thousand to 21.0 thousand (-29.1%); unit share decreased from 30.2% to 26.2%.

Non-tobacco-flavored e-cigarette sales decreased from 68.3 thousand to 58.8 thousand (-13.9%); unit share increased from 69.8% to 73.5%.

Menthol-flavored e-cigarette sales decreased from 32.5 thousand to 27.0 thousand (-17.0%); unit share increased from 33.2% to 33.7%.

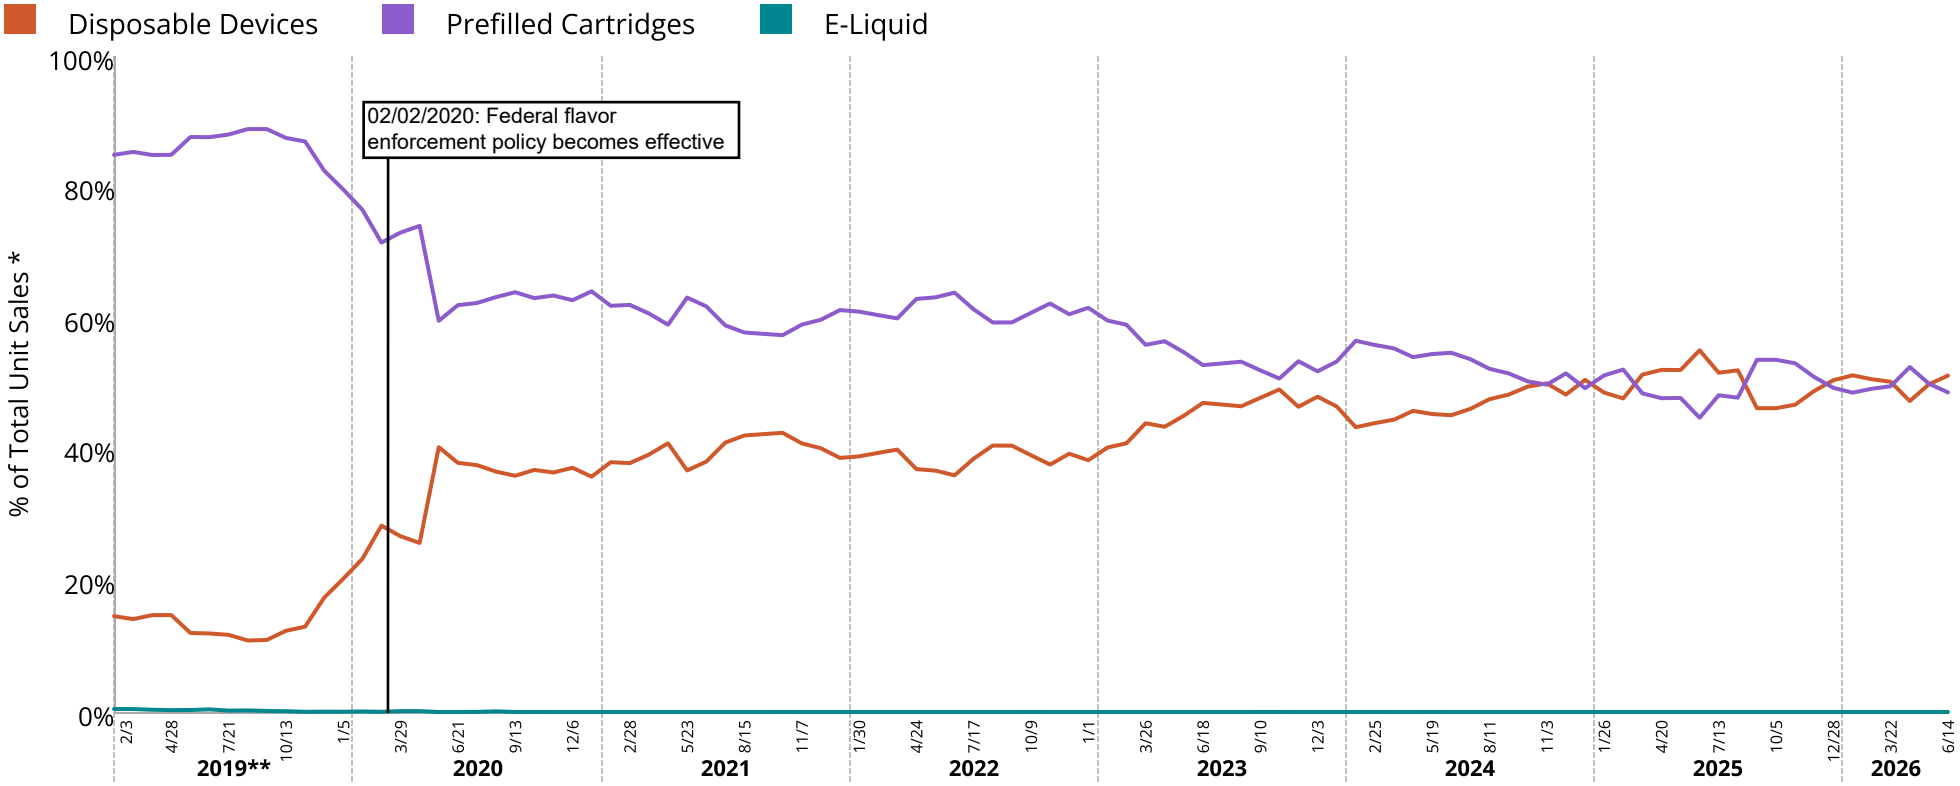

Mint-flavored e-cigarette sales decreased from 9.6 thousand to 2.2 thousand (-77.4%); unit share decreased from 9.8% to 2.7%.

All other-flavored e-cigarette sales increased from 26.0 thousand to 29.7 thousand (+14.2%); unit share increased from 26.6% to 37.1%.

Nationally, sales of novel clear and other-cooling flavored e-cigarettes increased starting around December 2022. In Nevada, between 12/4/2022 and 6/14/2026, clear/other cooling flavored e-cigarette sales were approximately zero.

† "All other flavors" category includes fruit, clove/spice, chocolate, alcoholic drink (e.g., wine, cognac or other cocktails), candy/desserts/other sweets, some other flavor; "clear/other cooling" category includes products with flavor names such as clear, clear ice or unflavored, which likely contain non-menthol synthetic cooling agents (e.g., Flum Pebble Clear, EB Design BC5000 Clear) and which observe an increase in sales following California's flavored tobacco product sales restrictions beginning December 2022.

Trends of Unit Sales by Flavor Following Rhode Island's Flavored E-Cigarette Restriction

From 9/15/2019 to 6/14/2026, unless otherwise specified

Following Rhode Island's flavored e-cigarette restrictions, monthly e-cigarette total unit sales decreased from 97.3 thousand to 61.2 thousand (-37.0%).

Tobacco-flavored e-cigarette sales increased from 22.6 thousand to 35.5 thousand (+56.8%); unit share increased from 23.3% to 57.9%.

Non-tobacco-flavored e-cigarette sales decreased from 74.6 thousand to 25.7 thousand (-65.5%); unit share decreased from 76.7% to 42.0%.

Following Rhode Island's flavored e-cigarette restrictions, menthol-flavored e-cigarette sales decreased from 12.1 thousand to 32 (-99.7%) by December 2024. Following Rhode Island's menthol flavor exemption beginning January 2025, menthol-flavored e-cigarette sales increased to 24.9 thousand as of June 2026; unit share increased to 40.7%.

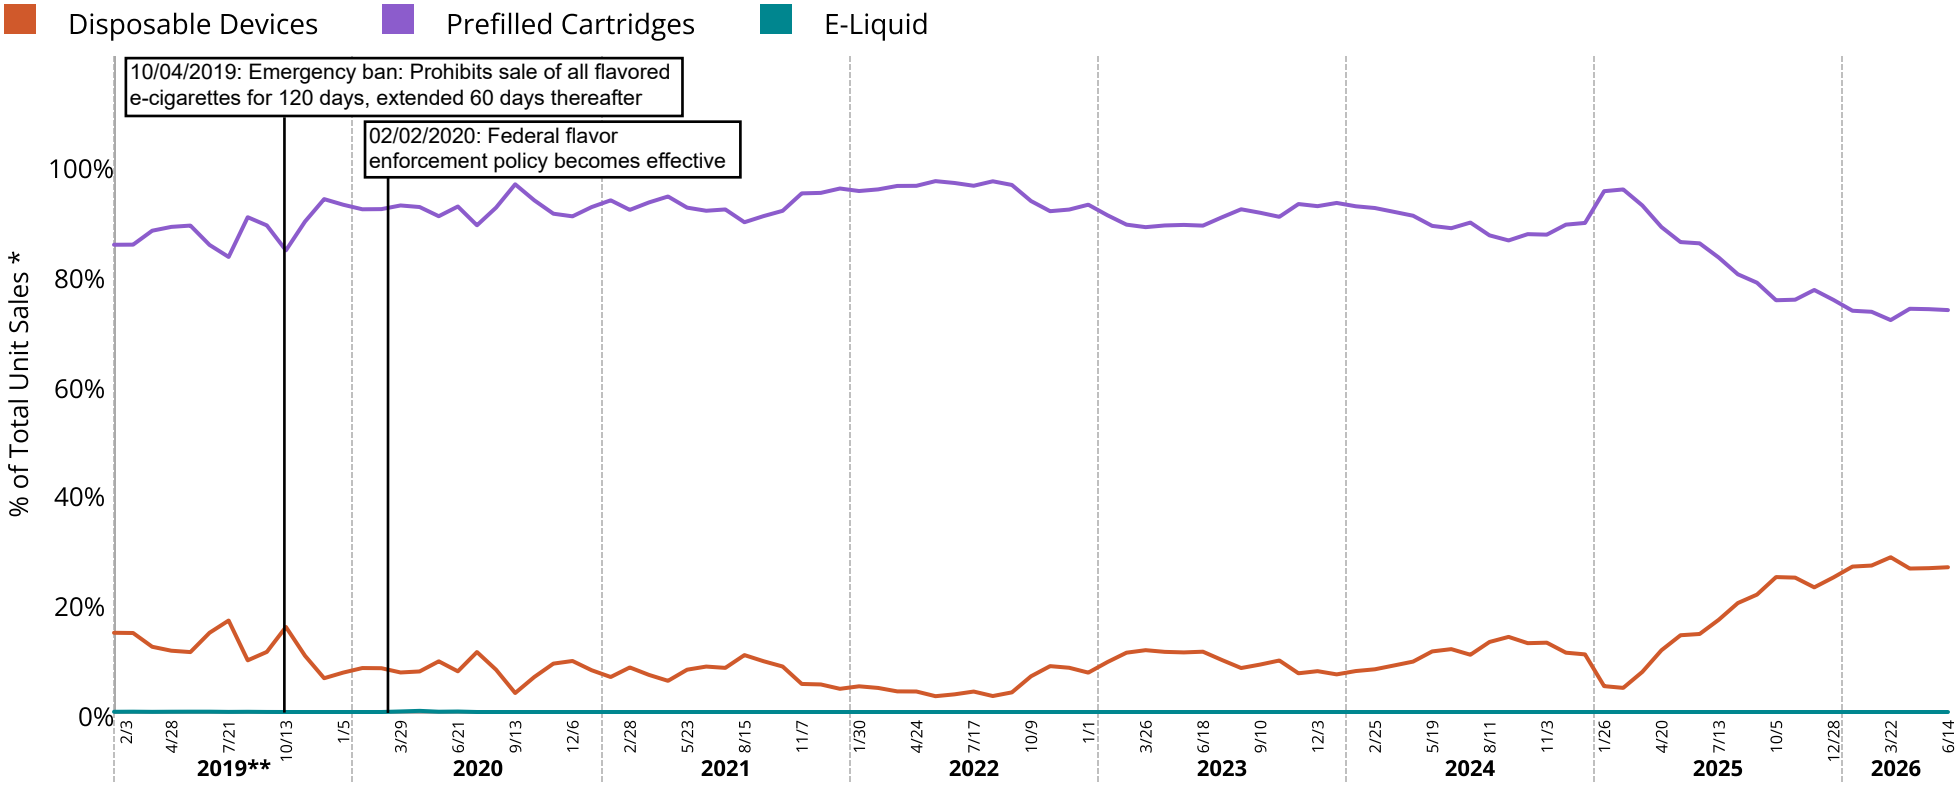

Mint-flavored e-cigarette sales decreased from 53.8 thousand to 50 (-99.9%); unit share decreased from 55.3% to 0.0%.

All other-flavored e-cigarette sales decreased from 8.7 thousand to 547 (-93.7%); unit share decreased from 9.0% to 0.9%.

Nationally, sales of novel clear and other-cooling flavored e-cigarettes increased starting around December 2022. In Rhode Island, between 12/4/2022 and 6/14/2026, clear/other cooling flavored e-cigarette sales decreased from 2.6 thousand to 248 (-90.3%); unit share decreased from 3.6% to 0.4%.

Retail sales data are based on custom research by the CDC Foundation using Circana retail POS (Multi-Outlet+ and Convenience). Financial support was provided by Bloomberg Philanthropies through a grant to the CDC Foundation. The findings and conclusions in this report are those of the authors and do not necessarily represent the official position of the CDC Foundation. According to Circana, new product coding is managed to consistently meet or exceed releasing products that cover a minimum of 95.5% of total dollar sales at any given time. To account for the remaining share, Circana applies projection algorithms that ensure the released data is representative of both total U.S. and state-level sales.

Figure 41. Rhode Island E-Cigarette Unit Share by Product Type

* Sales data do not reflect sales from vape shops or online retailers; dates represent end of 4-week periods; e-cigarette accessories and devices sold without e-liquids were excluded (1.4% of total dollar sales in 2025). Unit sales were standardized to reflect the most common package size for each product type. A standardized unit was equal to five prefilled cartridges, one disposable device or one e-liquid bottle.

** Sales estimates from 2019 reflect preserved data from custom CDC Foundation analyses using archived Circana data that are no longer updated or included in Circana's current sales projections.

Trends of Unit Sales by Product Type Following Rhode Island's Flavored E-Cigarette Restriction

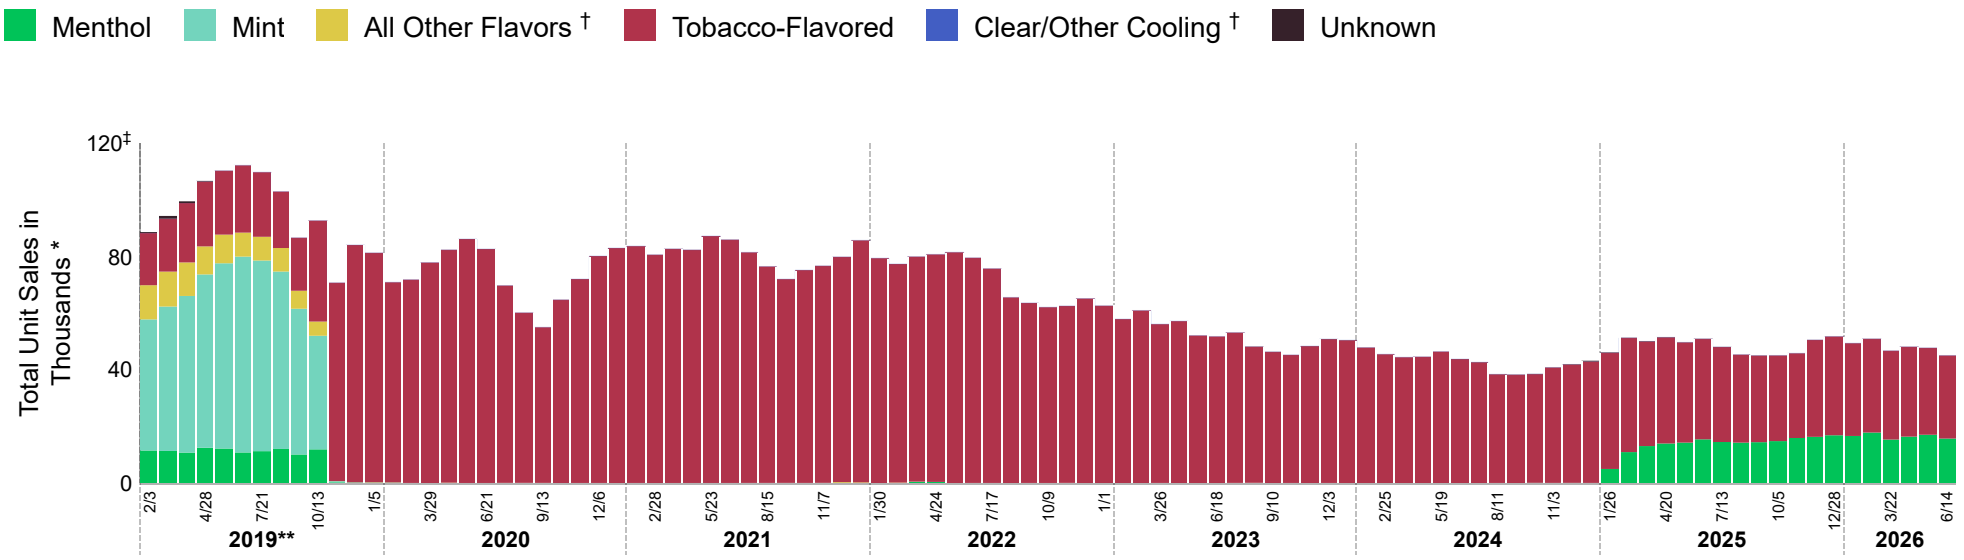

From 9/15/2019 to 6/14/2026

- Unit share of disposable devices increased from 11.0% to 26.5%; unit sales increased from 10.7 thousand to 16.2 thousand (+51.7%).
- Unit share of prefilled cartridges decreased from 89.0% to 73.5%; unit sales decreased from 86.6 thousand to 45.0 thousand (-48.0%).

Trends of Unit Sales by Flavor Following Utah's Flavored E-Cigarette Restriction

From 6/21/2020 to 6/14/2026, unless otherwise specified

Following Utah's flavored e-cigarette restrictions, monthly e-cigarette total unit sales decreased from 144.4 thousand to 46.0 thousand (-68.2%).

Tobacco-flavored e-cigarette sales decreased from 47.1 thousand to 13.0 thousand (-72.4%); unit share decreased from 32.6% to 28.3%.

Non-tobacco-flavored e-cigarette sales decreased from 97.2 thousand to 32.9 thousand (-66.1%); unit share increased from 67.3% to 71.7%.

Menthol-flavored e-cigarette sales decreased from 67.8 thousand to 32.9 thousand (-51.5%); unit share increased from 47.0% to 71.7%.

Mint-flavored e-cigarette sales decreased from 2.5 thousand to 1 (-100.0%); unit share decreased from 1.7% to 0.0%.

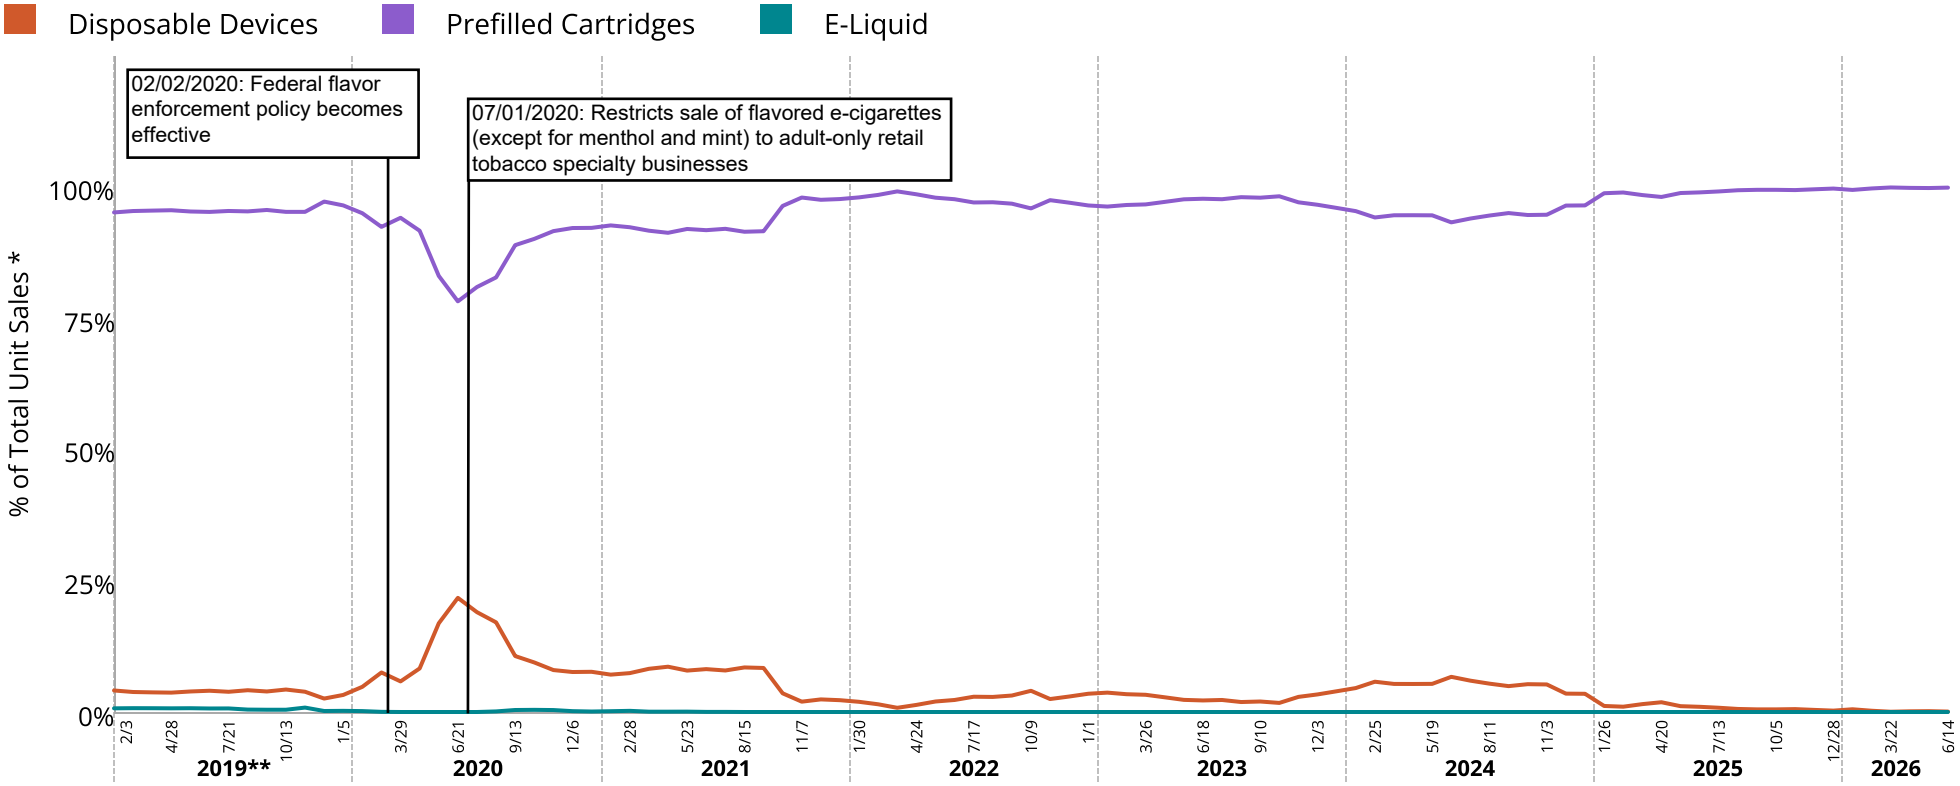

All other-flavored e-cigarette sales decreased from 26.6 thousand to 4 (-100.0%); unit share decreased from 18.4% to 0.0%.

Nationally, sales of novel clear and other-cooling flavored e-cigarettes increased starting around December 2022. In Utah, between 12/4/2022 and 6/14/2026, clear/other cooling flavored e-cigarette sales were approximately zero.
